## **Error Numbers and Descriptions for Microsoft Access 2007**

### **Number Description**

---

5	Invalid procedure call or argument
6	Overflow
7	Out of memory
9	Subscript out of range
10	This array is fixed or temporarily locked
11	Division by zero
13	Type mismatch
14	Out of string space
16	Expression too complex
17	Can't perform requested operation
18	User interrupt occurred
28	Out of stack space
47	Too many DLL application clients
48	Error in loading DLL
49	Bad DLL calling convention
51	Internal error
52	Bad file name or number
53	File not found
54	Bad file mode
55	File already open
57	Device I/O error
58	File already exists
59	Bad record length
61	Disk full
62	Input past end of file
63	Bad record number
67	Too many files
68	Device unavailable
70	Permission denied
71	Disk not ready
74	Can't rename with different drive
75	Path/File access error
76	Path not found

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

93	Invalid pattern string
96	Unable to sink events of object because the object is already firing events to the maximum number of event receivers that it supports
97	Can not call friend function on object which is not an instance of defining class
98	A property or method call cannot include a reference to a private object, either as an argument or as a return value
321	Invalid file format
322	Can't create necessary temporary file
325	Invalid format in resource file
380	Invalid property value
381	Invalid property array index
382	Set not supported at runtime
383	Set not supported (read-only property)
385	Need property array index
387	Set not permitted
393	Get not supported at runtime
394	Get not supported (write-only property)
422	Property not found
423	Property or method not found
424	Object required
429	ActiveX component can't create object
430	Class does not support Automation or does not support expected interface
432	File name or class name not found during Automation operation
438	Object doesn't support this property or method
440	Automation error
442	Connection to type library or object library for remote process has been lost. Press OK for dialog to remove reference.
443	Automation object does not have a default value
445	Object doesn't support this action
446	Object doesn't support named arguments
447	Object doesn't support current locale setting
448	Named argument not found
449	Argument not optional
450	Wrong number of arguments or invalid property assignment
451	Property let procedure not defined and property get procedure did not return an object
452	Invalid ordinal
453	Specified DLL function not found
454	Code resource not found
455	Code resource lock error
457	This key is already associated with an element of this collection
458	Variable uses an Automation type not supported in Visual Basic
459	Object or class does not support the set of events

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

460	Invalid clipboard format
461	Method or data member not found
462	The remote server machine does not exist or is unavailable
463	Class not registered on local machine
481	Invalid picture
482	Printer error
735	Can't save file to TEMP
744	Search text not found
746	Replacements too long
2001	You canceled the previous operation.
2002	You tried to perform an operation involving a function or feature that was not installed in this version of Microsoft Office Access.
2004	There isn't enough memory to perform this operation. Close unneeded programs and try the operation again.
2005	There isn't enough free memory to start Microsoft Office Access. Close unneeded programs and try again. For information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
2006	The object name 'I' you entered doesn't follow Microsoft Office Access object-naming rules. For more information about naming objects, click Help.
2007	You already have an open database object named 'I.' Use a different name for each database object of the same type. If you want this object to replace the original object, close the original object, and then save this object using the same name. For more information on renaming a database object, click Help.
2008	You can't delete the database object 'I' while it's open. Close the database object, and then delete it.
2009	You can't rename the database object 'I' while it's open. Close the database object, and then rename it.
2010	You can't delete the database object 'I' while it's open. Close the database object, and then delete it.
2011	The password you entered is incorrect.
2014	You have given this I1 the same name as an existing I2 in your database. You can't give a table and a query the same name. Give this object a name that isn't already used by another table or query.
2015	There are no registered wizards of this type. Rerun Microsoft Office Access or Microsoft Office Setup to reinstall the wizards. If you want to preserve your security or custom settings, back up the Microsoft Office Access workgroup information file. For more information on backing up files, search the Microsoft Windows Help index for 'backing up files'.
2016	You can't modify the attributes of System Tables.
2017	Microsoft helps protect this Visual Basic for Applications Project with a password. You must supply the password in the Visual Basic Editor before you can perform this operation.
2018	The data access page name 'I' you entered is misspelled or refers to a data access page that isn't open or doesn't exist.
2019	The number you used to refer to the data access page is invalid. Use the Count property to count the open data access pages and make sure that the page number is not greater than the number of open data access pages minus one.
2020	Application-defined or object-defined error

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2021 One or more operators in the filter expression is invalid. For a valid list of operators refer to the help file.
- 2022 You entered an expression that requires a data access page to be the active window.
- 2023 Application-defined or object-defined error
- 2024 The report snapshot was not created because you don't have enough free disk space for temporary work files. To fix this, free up disk space (for example, empty the Recycle Bin or delete unnecessary files).
- 2025 The file is not in the correct format for a Microsoft Office Access project.
- 2026 Application-defined or object-defined error
- 2027 This operation is not supported for Microsoft Office Access 1.X databases.
- 2028 Microsoft Office Access was unable to close the database object.
- 2029 Microsoft Office applications cannot suspend while you have documents open from a network location. Exit the applications or close the open documents and try again.
- 2030 The Microsoft Office Access project 'I' will be opened read-only because one of the following occurred: Either the file is locked for editing by another user, the file (or the folder in which it is located) is marked as read-only, or you specified that you wanted to open the file read-only.
- 2031 You can't convert or enable an MDE file.
- 2032 Application-defined or object-defined error
- 2033 Name conflicts with existing module, project, or object library.
- 2034 Cannot Compile Project.
- 2035 Cannot Load Project of wrong version.
- 2036 Application-defined or object-defined error
- 2037 Microsoft Office Access could not perform name AutoCorrect during this operation. The 'Log name AutoCorrect' option is set, but the Data and Misc. Objects is not checked out.
- 2038 The file 'I' cannot be opened because it has been locked by another user.
- 2039 Application-defined or object-defined error
- 2040 Microsoft Office Access can't run.
- 2041 Microsoft Office Access couldn't find file 'I'. This file is required for startup.
- 2042 A system error occurred, or there isn't enough free memory to start Microsoft Office Access. Close unneeded programs and try again.
- 2043 Microsoft Office Access can't find the database file 'I'. Make sure you entered the correct path and file name.
- 2044 You can't exit Microsoft Office Access now. If you're running a Visual Basic module that is using OLE or DDE, you may need to interrupt the module.
- 2045 The command line you used to start Microsoft Office Access contains an option that Microsoft Office Access doesn't recognize. Exit and restart Microsoft Office Access using valid command-line options.
- 2046 The command or action 'I' isn't available now. \* You may be in a read-only database or an unconverted database from an earlier version of Microsoft Office Access. The type of object the action applies to isn't currently selected or isn't in the active view. Use only those commands and macro actions that are currently available for this database.
- 2047 Application-defined or object-defined error
- 2048 There isn't enough free memory to open the file 'I'. Close unneeded programs and try again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2049 Application-defined or object-defined error
- 2050 Enter an OLE/DDE Timeout setting from 0 through 300 seconds.@@@1@@@1
- 2051 The object name '|1' can't be longer than |2 characters according to Microsoft Office Access object-naming rules.@@@1@@@1
- 2052 There isn't enough free memory to update the display. Close unneeded programs and try again.
- 2053 The command name can't be blank.@Please choose a name.@@1@@@1
- 2054 Microsoft Office Access is unable to load the Visual Basic for Applications dynamic-link library (DLL) Vbe6.@Rerun the Microsoft Office Access Setup program.@@1@@@3
- 2055 The expression '|' you entered is invalid.@@@1@1@11732@1
- 2056 Microsoft Office Access can't supply context-sensitive Help.@@@1@@@1
- 2057 There isn't enough stack memory left to perform the operation.@The operation is too complicated. Try simplifying the operation.@@1@@@3
- 2058 The file '|' is incompatible. Microsoft Office Access needs to be reinstalled.@Run Setup to reinstall Microsoft Office Access. If you want to preserve your security or custom settings, back up the Microsoft Office Access workgroup information file. For more information on backing up files, search the Microsoft Windows Help index for 'backing up files'.@@1@@185309@3
- 2059 Microsoft Office Access cannot find the object '|'.@Make sure the object exists and that you spell its name correctly.@@1@@@1
- 2060 You can't create a field list based on the action query '|'.@Action queries don't have fields. A form or report must be based on a table, or on a select or crosstab query.@Change the RecordSource property for the form or report, or open the action query and change it to a select query.@1@1@9232@1
- 2061 Enter a zero or greater-than-zero number for this option.@@@1@@@1
- 2062 The command name must be shorter than 255 Characters.@Please choose a name.@@1@@@1
- 2063 Microsoft Office Access can't create, open, or write to the index file '|'; the information (.inf) file it uses to keep track of dBASE indexes.@The index file may be damaged, or you may not have read/write permission for the network drive you're trying to link to.@You can link to the dBASE file without specifying any dBASE indexes, but the existing indexes will not be used with the linked table.@1@@@1
- 2064 The menu bar value '|' is invalid.@You supplied an argument to the DoMenuItem method that refers to a menu bar that is invalid.@Use an intrinsic constant or numeric value that refers to a valid menu bar value, such as acFormbar.@1@1@11895@1
- 2065 The name for the menu, command, or subcommand you entered is invalid.@You supplied an argument to the DoMenuItem method that refers to a menu name, command, or subcommand that is invalid.@Use an intrinsic constant or numeric value that refers to a valid menu, command, or subcommand value, such as acRecordsMenu.@1@1@11895@1
- 2066 Application-defined or object-defined error
- 2067 A menu bar macro can only be run if the menu bar macro name is the setting used by particular properties or options.@You tried to run a menu bar macro containing the AddMenu action. Set one of the following properties or options to the name of the menu bar macro:  The MenuBar property of a form or report.  The ShortcutMenuBar property of a form, report, or control.  The Menu Bar or Shortcut Menu Bar option in the Startup dialog box. This error also occurs if Microsoft Office Access attempts to run a menu bar macro containing an AddMenu action that follows an action that makes some other object the active object. For example, the OpenForm action.@@2@1@3704@1
- 2068 The selected item is customized and doesn't have context-sensitive Help.@For more information on creating custom Help for a form, report, or control, click Help.@@2@1@10930@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2069 The key or key combination |1 in |2 has invalid syntax or is not allowed. Use the SendKeys syntax to specify the key or key combinations. For the allowed key or key combinations, click Help. @2@1@10144@1
- 2070 You already assigned the key or key combination |1 in |2 to another macro. Only the first key or key combination will be used. @2@1@10144@1
- 2071 The Docking property can't be set to '|1' at this time. If you want to set the Docking property to '|2', move the toolbar from its current position and try again. @1@@@1
- 2072 All objects were imported successfully.
- 2073 Successfully exported '|'. @1@1@1
- 2074 This operation is not supported within transactions. @1@1@1@1
- 2075 This operation requires an open database. @1@1@1@1
- 2076 Successfully linked '|'. @1@1@1
- 2077 This Recordset is not updatable
- 2078 Help isn't available due to lack of memory or improper installation of Microsoft Windows or Microsoft Office Access. For more information on troubleshooting a low memory problem, search the Microsoft Windows Help index for 'memory, troubleshooting'. If you need to reinstall Microsoft Office Access, you may want to preserve your security or custom settings. To do so, back up the Microsoft Office Access workgroup information file. For more information on backing up files, search the Microsoft Windows Help index for 'backing up files'. @1@@@3
- 2079 Form is read-only, because the Unique Table property is not set.
- 2080 The toolbar or menu | already exists. Do you want to replace the existing toolbar or menu? @19@@@2
- 2081 The Create From Macro command only works when a macro is selected in the Navigation Pane. @1@1@1@1
- 2082 Application-defined or object-defined error
- 2083 The database '|' is read-only. You can't save changes made to data or object definitions in this database. @1@1@1@1
- 2084 Field '|' is based on an expression and can't be edited
- 2085 The ODBC Refresh Interval setting must be from 1 through 32,766 seconds. @1@1@1@1
- 2086 Recordset requires a form to be updatable.
- 2087 Microsoft Office Access can't display the Add-ins submenu. The Add-ins submenu expression '|' you entered exceeds the 256-character limit. Shorten the macroname or functionname expression in the Menu Add-ins key of the Windows Registry setting, and then restart Microsoft Office Access. For more information on customizing Microsoft Office Access settings in the Windows Registry, click Help. @2@1@9015@3
- 2088 Microsoft Office Access can't display the Add-ins submenu | because a setting you entered in the Windows Registry is missing a macro name or function name expression. Supply the missing expression in the Menu Add-ins key of the Windows Registry, and then restart Microsoft Office Access. For more information on customizing Microsoft Office Access settings in the Windows Registry, click Help. @2@1@9015@3
- 2089 Microsoft Office Access can't display the same menu more than once in a menu bar. @1@1@1@3704@1
- 2090 An action within the current global menu's macro group can't change the global menu bar. Microsoft Office Access can't display the global menu bar because the macro called when you first set the global menu includes another action that tries to reset the global menu. Check your menu bar macros, and make sure that you set the global menu bar only once. @1@@@1
- 2091 '|' is an invalid name. @1@1@1@1@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2092 The value you specified for the Setting argument in the SetOption method is not the correct type of Variant for this option. You specified a string when Microsoft Office Access expected a number. See the Access Options dialog box (click the Microsoft Office Button, and then click Access Options) to see what type of data is required to set this particular option. For example, the setting for the Default Database Folder option must be a string. To see what type of Variant you passed to the SetOption method, use the VarType function. For more information, search the Help index for 'Variant data type' and 'VarType function'.
- 2093 The numeric value for the Setting argument in the SetOption method does not correspond to any list box or option group settings in the Access Options dialog box. Valid settings are 0 (the first item in the list) through | (the last item in the list).
- 2094 Microsoft Office Access cannot find the toolbar '|.' You tried to run a macro that includes a ShowToolbar action or a Visual Basic for Applications procedure that includes a ShowToolbar method. The toolbar name might be misspelled or might refer to a legacy toolbar that is no longer available. This action might refer to a custom toolbar that was deleted from or renamed in the current database. This action might refer to a custom toolbar that exists in a different database.
- 2095 Application-defined or object-defined error
- 2096 Application-defined or object-defined error
- 2097 The table for which you tried to create an import/export specification was created in an earlier version of Microsoft Office Access. To convert this database to the current version of Microsoft Office Access, click the Microsoft Office Button, and then click 'Convert'.
- 2098 The operation could not be completed because the Smart Tag '|' is not recognized by your system.
- 2100 The control or subform control is too large for this location. The number you entered for the Left, Top, Height, or Width property is too large or is a negative number. Reduce the size of the control or subform control, or enter a positive number.
- 2101 The setting you entered isn't valid for this property. To see the valid settings for this property, search the Help index for the name of the property.
- 2102 The form name '|' is misspelled or refers to a form that doesn't exist. If the invalid form name is in a macro, an Action Failed dialog box will display the macro name and the macro's arguments after you click OK. Open the Macro window, and enter the correct form name.
- 2103 The report name '|' you entered in either the property sheet or macro is misspelled or refers to a report that doesn't exist. If the invalid report name is in a macro, an Action Failed dialog box will display the macro name and the macro's arguments after you click OK. Open the Macro window, and enter the correct report name.
- 2104 You entered the control name '|,' which is already in use. You already have a control on the form with this name, or an existing control has its name mapped to this name for Visual Basic. Visual Basic maps spaces in control names to underscores. For example, My Control and My\_Control are treated as duplicate names.
- 2105 You can't go to the specified record. You may be at the end of a recordset.
- 2106 | errors occurred when you loaded the form or report. You loaded a form or report that has controls or properties that Microsoft Office Access doesn't recognize and will ignore.
- 2107 The value you entered does not meet the validation rule defined for the field or control. To see the validation rule, switch to Design view, click the appropriate field, and then, if the property sheet is not open, press F4. Then, click the Data tab in the property sheet. Enter a value that meets the validation rule, or press ESC to undo your changes.
- 2108 You must save the field before you execute the GoToControl action, the GoToControl method, or the SetFocus method. You tried to move the focus to another control using the SetFocus method, GoToControl action, or the GoToControl method. Set the macro or method to the AfterUpdate property instead of the BeforeUpdate property so it saves the field before changing the focus.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2109 There is no field named '|' in the current record.
- 2110 Microsoft Office Access can't move the focus to the control |.\* The control may be a type that can't receive the focus, such as a label. The control's Visible property may be set to No. The control's Enabled property may be set to No.
- 2111 The changes you made can't be saved. The save operation may have failed due to the temporary locking of the records by another user. Click OK to try again. You may need to click OK several times (or wait until the other user closes the table). Click Cancel if repeated attempts to save your changes fail.
- 2112 The item on the Clipboard can't be pasted into this control.
- 2113 The value you entered isn't valid for this field. For example, you may have entered text in a numeric field or a number that is larger than the FieldSize setting permits.
- 2114 Microsoft Office Access doesn't support the format of the file '|,' or file is too large. Try converting the file to BMP format.
- 2115 The macro or function set to the BeforeUpdate or ValidationRule property for this field is preventing Microsoft Office Access from saving the data in the field.\* If this is a macro, open the macro in the Macro window and remove the action that forces a save (for example, GoToControl). If the macro includes a SetValue action, set the macro to the AfterUpdate property of the control instead. If this is a function, redefine the function in the Module window.
- 2116 The value violates the validation rule for the field or record. For example, you might have changed a validation rule without verifying whether the existing data matches the new validation rule. Click Undo to restore the previous value, or enter a new value that meets the validation rule for the field or record.
- 2117 Microsoft Office Access has canceled the Paste operation. The text on the Clipboard is too long to paste into the form. For example, you may have pasted too much text into a label or entered too much text in the ColumnWidths property. Paste smaller sections. For labels, you must paste fewer than 2,048 characters.
- 2118 You must save the current field before you run the Requery action.\* If you are running a macro from the Navigation Pane, save the field first, and then run the macro. If the macro name is the setting of the BeforeUpdate property in a Visual Basic function, set the AfterUpdate property to the name of the macro instead.
- 2119 The Requery action can't be used on the control '|.' Certain controls, such as labels and rectangles, can't receive the focus; therefore, you can't apply a Requery action to them.
- 2120 To create a form, report or data access page using this wizard, you must first select the table or query on which the form, report or data access page will be based.
- 2121 Microsoft Office Access can't open the form '|.' It contains data that Microsoft Office Access doesn't recognize. Re-create the form or, if you maintain backup copies of your database, retrieve a copy of the form.
- 2122 You can't view a form as a continuous form if it contains a subform, an ActiveX control, or a bound chart. Set the DefaultView property of the form to Single Form, Datasheet, PivotTable, or PivotChart.
- 2123 The control name you entered doesn't follow Microsoft Office Access object-naming rules.
- 2124 The form name you entered doesn't follow Microsoft Office Access object-naming rules.
- 2125 The setting for the FontSize property must be from 1 through 127.
- 2126 The setting for the ColumnCount property must be from 1 through 255.
- 2127 The setting for the BoundColumn property can't be greater than the setting for the ColumnCount property.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2128 Microsoft Office Access encountered errors while importing |1. For more detailed error information, see the file '|2'. @1@@@1
- 2129 The setting for the DefaultEditing property must be Allow Edits, Read Only, Data Entry, or Can't Add Records. Enter 1, 2, 3, or 4 for the DefaultEditing property. @1@@@1
- 2130 The settings for the GridX and GridY properties must be from 1 through 64. @@@1@@@1
- 2131 An expression can't be longer than 2,048 characters. @@@1@@@1
- 2132 The setting for the DecimalPlaces property must be from 0 through 15, or 255 for Auto (default). @@@1@@@1
- 2133 You can't place a form (or report) within itself. Select or enter a different form or report to serve as the subform or subreport. @1@@@1
- 2134 The setting for the Width property must be from 0 through 22 inches (55.87 cm). @@@1@@@1
- 2135 This property is read-only and can't be set. @@@1@@@1
- 2136 To set this property, open the form or report in Design view. For more information on this property, search the Help index for the name of the property. @1@@@1
- 2137 You can't use Find or Replace now. The fields are not searchable due to one of the following:  The fields are controls (such as buttons or OLE objects).  The fields have no data.  There are no fields to search. @1@@@1
- 2138 You can't search the field for the specified value. Resolve the error given in the previous error message before you attempt to search again. @1@@@1
- 2139 You can't replace the current value of the field with the replacement text. Resolve any errors before making further replacements. @1@@@1
- 2140 Microsoft Office Access cannot save the change you made to the record in the Replace operation for the reason shown in the previous message. Click Undo or enter a new value in the field. @1@@@1
- 2141 Microsoft Office Access can't find the text you specified in the Find What box. @@@1@@@1
- 2142 The FindRecord action requires a Find What argument. You tried to run a macro set to one of the current field's properties, but you left the Find What argument blank. When you click OK, an Action Failed dialog box will display the macro name and the macro's arguments. In the Macro window, enter text or an expression for the Find What argument, and try the Search operation again. @1@1@3015@1
- 2143 You didn't specify search criteria with a FindRecord action. In the Macro window, insert a FindRecord action before the FindNext action. @1@1@3015@1
- 2144 The setting for the ListRows property must be from 1 through 255. @@@1@1@4055@1
- 2145 The ColumnWidths property setting must be a value from 0 through 22 inches (55.87 cm) for each column in a list box or a combo box. If there is more than one column, separate the numbers with either a semicolon or the list separator character. List separator characters are defined in the Regional Settings section of Windows Control Panel. @1@1@847@1
- 2146 Application-defined or object-defined error
- 2147 You must be in Design view to create or delete controls. @@@1@2@5054@1
- 2148 The number you used to refer to the form or report section is invalid. Make sure that the number is less than the number of sections in the form or report. @1@@@1
- 2149 The constant you entered for the control type is invalid. For a list of valid constants you can use to create a control, click Help. @2@1@10905@1
- 2150 This type of control can't contain other controls. @@@1@@@1
- 2151 The parent control can't contain the type of control you selected. For example, you used the CreateControl function to designate an option group as the parent of a text box. @1@@@1
- 2152 You can set group levels for reports only, not for forms. @@@1@@@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2153 You can't specify more than 10 group levels.
- 2154 You can't call this function when the Group, Sort, and Total Pane is open.
- 2155 Application-defined or object-defined error
- 2156 Application-defined or object-defined error
- 2157 The sum of the top margin, the bottom margin, the height of the page header, and the height of the page footer is greater than the length of the page you are printing on.
- 2158 You can use the Print method and the report graphics methods (Circle, Line, PSet, and Scale) only in an event procedure or a macro set to the OnPrint, the OnFormat, or the OnPage event property.
- 2159 There isn't enough memory to initialize the Print method or one of the report graphics methods (Circle, Line, PSet, Scale). Close unneeded programs and try again to print or preview the report. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2160 Microsoft Office Access couldn't create the graphic or text. An error occurred while initializing the Print method or one of the report graphics methods (Circle, Line, PSet, Scale). Close unneeded programs and try again to print or preview the report. For information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2161 The text or expression you entered doesn't match the type of data you are searching for. Redefine the text or expression, or search in a different field.
- 2162 A macro set to one of the current field's properties failed because of an error in a FindRecord action argument. In the Macro window, change the Search As Formatted argument to Yes. If you want the argument setting to remain No, do all of the following: Select No for the Match Case argument. Select Yes for the Only Current Field argument. Make sure you are searching in a bound control.
- 2163 The page number you used as an argument for the GoToPage action or method doesn't exist in this form.
- 2164 You can't disable a control while it has the focus.
- 2165 You can't hide a control that has the focus.
- 2166 You can't lock a control while it has unsaved changes.
- 2167 This property is read-only and can't be modified.
- 2169 You can't save this record at this time. Microsoft Office Access may have encountered an error while trying to save a record. If you close this object now, the data changes you made will be lost. Do you want to close the database object anyway?
- 2170 There isn't enough memory to retrieve data for the list box. Close unneeded programs. Then close and reopen the active form, and click the list box again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2171 You can't have more than seven nested subforms in a main form. Remove the eighth nested subform.
- 2172 You can't use a pass-through query or a non-fixed-column crosstab query as a record source for a subform or subreport. Before you bind the subform or subreport to a crosstab query, set the query's ColumnHeadings property.
- 2173 The control 'I' the macro is attempting to search can't be searched. Try one of the following: Add a GoToControl action before the FindRecord action. For the FindRecord action, change the Only Current Field action argument from Yes to No. Change the focus to a searchable control.
- 2174 You can't switch to a different view at this time. Code was executing when you tried to switch views. If you are debugging code, you must end the debugging operation before switching views.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2175 There isn't enough free memory to continue the Search operation. Close unneeded programs. Then try the Search operation again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2176 The setting for this property is too long. You can enter up to either 255 or 2,048 characters for this property, depending on the data type.
- 2177 You can't insert a report into a form. A report can be inserted only into a report.
- 2178 You can't add another section now. The maximum total height for all sections in a report, including the section headers, is 200 inches (508 cm). Remove or reduce the height of at least one section, and then add the new section.
- 2181 You can't sort on a calculated field in a form. You can sort on a calculated field only in a query. Create a calculated field in a query, sort the field, and then base the form on the query. Because the query must execute before the form opens, the form will open more slowly.
- 2182 You can't sort on this field.
- 2183 Microsoft Office Access can't create an object of the type requested. You are trying either to create a form from a report that has been saved as text, or to create a report from a saved form.
- 2184 The value you used for the TabIndex property isn't valid. The correct values are from 0 through |.
- 2185 You can't reference a property or method for a control unless the control has the focus. Try one of the following: Move the focus to the control before you reference the property. In Visual Basic code, use the SetFocus method. In a macro, use the GoToControl action. Reference or set the property from a macro or event procedure that runs when the GotFocus event for the control occurs.
- 2186 This property isn't available in Design view. Switch to Form view to access this property, or remove the reference to the property.
- 2187 This property is available only in Design view.
- 2188 The object you attempted to load from text has an invalid value for the property '|1' on a |2.
- 2189 The code contains a syntax error, or a Microsoft Office Access function you need is not available. If the syntax is correct, check the Control Wizards subkey or the Libraries key in the Microsoft Office Access section of the Windows Registry to verify that the entries you need are listed and available. If the entries are correct, either you must correct the Microsoft Office Access Utility Add-in, or the file acWzlib or this wizard has been disabled. To reenable this wizard, run Microsoft Office Access or Microsoft Office Setup again to reinstall Microsoft Office Access. Before you reinstall Microsoft Office Access, delete the Windows Registry keys for the Microsoft Office Access Utility Add-in and acWzlib.
- 2190 This property has been replaced by a new property; use the new property instead.
- 2191 You can't set the | property in print preview or after printing has started. Try setting this property in the OnOpen event.
- 2192 The bitmap you specified is not in a device-independent bitmap (.dib) format. You tried to set the PictureData property of a form, report, button, or image control.
- 2193 The left margin, right margin, or both margins are wider than the paper size specified in the Print Setup dialog box.
- 2194 You can't set the PictureData property in Datasheet view. To see the valid settings for this property, search the Help index for 'PictureData property'.
- 2195 The section name you entered doesn't follow Microsoft Office Access object-naming rules.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2196 Microsoft Office Access can't retrieve the value of this property. The property isn't available from the view in which you're running the macro or Visual Basic code, or Microsoft Office Access encountered an error while retrieving the value of the property. To see the valid settings for this property, search the Help index for the name of the property.
- 2197 You can't set a subform control's SourceObject property to a zero-length string if you're displaying the main form in Form view. You can set this property to a zero-length string from Design view, Datasheet view, or Print Preview.
- 2200 The number you entered is invalid.
- 2201 There was a problem retrieving printer information for the |1 on |2. The object may have been sent to a printer that is unavailable.
- 2202 There are currently no printers installed on your computer. To use this feature, you must first install a printer in Windows. For more information about how to install a printer, search for "install printer" in Windows Help.
- 2203 The dynamic-link library Commdlg failed: error code '0x|'. The printer driver for the selected printer may be incorrectly installed. For information on selecting another printer or reinstalling this printer from Microsoft Windows, search the Windows Help index for 'printer setup'.
- 2204 The default printer driver isn't set up correctly. For information on setting a default printer, search the Microsoft Windows Help index for 'default printer, setting'.
- 2205 The default printer driver isn't set up correctly. For information on setting a default printer, search the Microsoft Windows Help index for 'default printer, setting'.
- 2206 The page number you entered is invalid. For example, it may be a negative number or an invalid range, such as 6 to 3.
- 2207 Microsoft Office Access can't print macros. You tried to use the PrintOut action or method, but the active object is a macro. If you want to print an object other than a macro, use the SelectObject action or method to select the desired object before you run the PrintOut action.
- 2210 Microsoft Office Access can't print or preview the page because the page size you selected is larger than 22.75 inches.
- 2211 Microsoft Office Access can't print or preview the Debug window.
- 2212 Microsoft Office Access couldn't print your object. Make sure that the specified printer is available. For information on setting a default printer, search the Windows Help index for 'default printer, setting'.
- 2213 There was a problem retrieving printer information for this object. The object may have been sent to a printer that is unavailable.
- 2214 There was a problem retrieving information from the printer. New printer has not been set.
- 2215 Microsoft Office Access cannot print this PivotTable because its |1 exceed(s) 22.75 inches. Reduce the |1 by making changes to the formatting or included data of the PivotTable view, and then try to print again.
- 2220 Microsoft Office Access can't open the file '|'.
- 2221 The text is too long to be edited.
- 2222 This control is read-only and can't be modified.
- 2223 The file name '|' is too long. Enter a file name that's 256 characters or less.
- 2225 Microsoft Office Access couldn't open the Clipboard. The Clipboard isn't responding, probably because another application is using it. Close all other applications and try the operation again.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2226 The Clipboard isn't responding, so Microsoft Office Access can't paste the Clipboard's contents. Another application may be using the Clipboard. There may not be enough free memory for the paste operation. Close all other applications, and then copy and paste again.
- 2227 The data on the Clipboard is damaged, so Microsoft Office Access can't paste it. There may be an error in the Clipboard, or there may not be enough free memory. Try the operation again.
- 2229 Microsoft Office Access can't start the OLE server. You tried to use a form, report, or datasheet that contains an OLE object, but the OLE server (the application used to create the object) may not be registered properly. Reinstall the OLE server to register it correctly.
- 2234 Microsoft Office Access can't paste the OLE object.
- 2237 The text you entered isn't an item in the list. Select an item from the list, or enter text that matches one of the listed items.
- 2239 Microsoft Office Access has detected that this database is in an inconsistent state, and cannot attempt to recover the database because the file is read-only. To allow Access to recover the database, close the database and set the file to read/write, and then open the database.
- 2243 The data in the Clipboard isn't recognizable; Microsoft Office Access can't paste the OLE object.
- 2244 The file name you specified in the Picture property for a command button or toggle button can't be read. The file you specified may be corrupted. Restore the file from a backup copy or re-create the file. The disk where the file is located may be unreadable.
- 2245 The file you specified doesn't contain valid icon data. Specify a valid icon file.
- 2246 Application-defined or object-defined error
- 2260 An error occurred while sending data to the OLE server (the application used to create the object). You may have tried to send too much data. If you're creating a chart and the chart is based on a query, modify the query so that it selects less data. If the chart is based on a table, consider basing it on a query instead so that you can limit the data. You may be using an OLE server that doesn't accept the Clipboard format. You may not be able to start the OLE server because it's not properly registered. Reinstall it to register it. Your computer may be low on memory. Close other application windows to free up memory.
- 2262 This value must be a number.
- 2263 The number is too large.
- 2264 Microsoft Office Access didn't recognize the unit of measurement. Type a valid unit, such as inches (in) or centimeters (cm).
- 2265 You must specify a unit of measurement, such as inches (in) or centimeters (cm).
- 2266 '!' may not be a valid setting for the RowSourceType property, or there was a compile error in the function. For information on valid settings for the RowSourceType property, click Help.
- 2267 There is not enough disk space to create a temporary buffer file for printing. Free up some disk space to make room for the temporary buffer file.
- 2269 Some library databases couldn't be loaded because too many were specified. To change library database references, click References on the Tools menu.
- 2272 The setting for the Update Retry Interval must be from 0 through 1,000 milliseconds.
- 2273 The setting for Update Retries must be from 0 through 10.
- 2274 The database '!' is already open as a library database.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2275 The string returned by the builder was too long. The result will be truncated.
- 2276 The custom builder you're using caused an error by changing the focus to a different window while you were using it. Enter a value without using the custom builder.
- 2277 There was a font initialization error.
- 2278 Microsoft Office Access can't save your changes to this bound OLE object. Either you don't have permission to write to the record in which the object is stored, or the record is locked by another user. Copy the object to the Clipboard (select the object and click Copy on the Edit menu), and click Undo Current Record on the Edit menu. Then open the application you used to create the object, paste the object from the Clipboard, and save it.
- 2279 The value you entered isn't appropriate for the input mask '|' specified for this field.
- 2280 You have added more output formats to the Windows Registry than Microsoft Office Access can initialize. Some output formats will not be available. Remove those formats that you never or least often use.
- 2281 Output format information is missing. There appears to be a problem with your Microsoft Office Access installation. Please reinstall Microsoft Office Access or contact your system administrator or help desk representative.
- 2282 The format in which you are attempting to output the current object is not available. Either you are attempting to output the current object to a format that is not valid for its object type, or the formats that enable you to output data as a Microsoft Excel, rich-text format, MS-DOS text, or HTML file are missing from the Windows Registry. Run Setup to reinstall Microsoft Office Access or, if you're familiar with the settings in the Registry, try to correct them yourself. For more information on the Registry, click Help.
- 2283 The format specification for '|' is invalid. You can't save output data to a file in this format until you correct the setting for the format in the Windows Registry. Run Setup to reinstall Microsoft Office Access or, if you're familiar with the settings in the Registry, try to correct them yourself. For more information on the Registry, click Help.
- 2284 Microsoft Office Access can't write to the file. \* The network may not be working. Wait until the network is working, and then try again. You may be out of memory. Close one or more Microsoft Office Access windows, close other applications, and then try again.
- 2285 Microsoft Office Access can't create the output file. \* You may be out of disk space on the destination drive. The network may not be working. Wait until the network is working, and then try again. You may be out of memory. Close one or more Microsoft Office Access windows, close other applications, and then try again.
- 2286 Microsoft Office Access can't close the file. \* The network may not be working. Wait until the network is working, and then try again. You may be out of memory. Close one or more Microsoft Office Access windows, close other applications, and then try again.
- 2287 Microsoft Office Access can't open the mail session. Check your mail application to make sure that it's working properly.
- 2288 Microsoft Office Access can't load the '|' format. The setting for this format in the Windows Registry is incorrect. You can't save the output data to a file in this format until you correct the setting in the Registry. Run Setup to reinstall Microsoft Office Access or, if you're familiar with the settings in the Registry, try to correct them yourself. For more information on the Registry, click Help.
- 2289 Microsoft Office Access can't output the module in the requested format.
- 2290 There were too many message recipients; the message was not sent.
- 2291 There are too many message attachments; the message was not sent.
- 2292 The message text is too long, so it was not sent.
- 2293 Microsoft Office Access can't send this e-mail message. Before attempting to send an e-mail message from Microsoft Office Access, resolve the problem identified in the previous message, or configure your computer to send and receive e-mail messages.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2294 Microsoft Office Access can't attach the object; the message was not sent. @\* The network may not be working. Wait until the network is working, and then try again. ☒ You may be out of memory. Close one or more Microsoft Office Access windows, close other applications, and then try again. @1@@@1

- 2313 Microsoft Office Access can't find the shortcut databases '|1' or '|2.'. @ Re-create the shortcut with the correct locations of the databases. @2@1@9032@1
- 2314 Microsoft Office Access can't find the shortcut database '|'. @ Re-create the shortcut with the correct location of the database. @2@1@9032@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2315 The input string is too long.
- 2316 This table or query can't be opened because it has no visible fields. This can result if the table or query has only system fields, and the Show System Objects option is off. To turn on the Show System Objects option, click Options on the Tools menu, click the View tab, and select the System Objects check box.
- 2317 The database 'I' can't be repaired or isn't a Microsoft Office Access database file.
- 2319 Application-defined or object-defined error
- 2320 Microsoft Office Access can't display the field for which you entered Where in the Total row. Clear the Show check box for that field. If you want this field to appear in the query's results, add it to the design grid twice. For the field that will appear in the query's results, don't specify Where in the Total row, and make sure the Show check box is checked.
- 2321 You can't set criteria before you add a field or expression to the Field row. Either add a field from the field list to the column and enter an expression, or delete the criteria.
- 2322 You can't sort on the asterisk (\*). Because the asterisk represents all fields in the underlying table or query, you can't sort on it. Add the asterisk to the query design grid, along with the specific fields you want to sort on. Clear the Show check box for the sorting fields, and then specify a sort order.
- 2323 You can't specify criteria for the asterisk (\*). Because the asterisk represents all the fields in the underlying table or query, you can't specify criteria for it. Add the asterisk to the query design grid, along with the field(s) you want to set criteria for, and then enter criteria for the specific fields. In the query design grid, clear the Show check box for the criteria field(s), before you run the query.
- 2324 You can't calculate totals on the asterisk (\*). Because the asterisk represents all the fields in the table, you can't calculate totals on it. Remove the asterisk from the query design grid. Add the fields you want to use to the design grid, and then select the total you want to calculate for specific fields.
- 2325 The field name you entered exceeds the 64-character limit of the LinkMasterFields property. When you use the Relationships command (on the Database Tools tab, click Relationships) to define a relationship between the tables underlying a form and subform, Microsoft Office Access links the form and subform automatically and sets the LinkChildFields and LinkMasterFields properties.
- 2326 You can't specify Group By, Expression, or Where in the Total row for this column. Specify an aggregate function, such as Sum or Count, for the field or expression you designate as the Value in the crosstab query. For more information on aggregate functions, click Help.
- 2327 You must enter Group By in the Total row for a field that has Column Heading in the Crosstab row. The values derived from the field or expression that you designate as the Column Heading are used to group data in the crosstab query.
- 2328 You can't run an update query on the asterisk (\*). Because the asterisk represents all the fields in the table, you can't update it. Remove the asterisk from the query design grid. Add the fields you want to update to the design grid.
- 2329 To create a crosstab query, you must specify one or more Row Heading(s) options, one Column Heading option, and one Value option.
- 2330 Microsoft Office Access can't represent the join expression | in Design view. One or more fields may have been deleted or renamed. The name of one or more fields or tables specified in the join expression may be misspelled. The join may use an operator that isn't supported in Design view, such as > or <.
- 2331 You must enter Group By in the Total row for at least one of the Row Heading options you enter in the Crosstab row.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2332 Microsoft Office Access can't match the fields you added using the asterisk (\*) in the append query. Because the asterisk represents all the fields in the underlying table or query, you can't append an asterisk to one field or expression, and you can't append a single field or expression to an asterisk. Append an asterisk to an asterisk (for example, a table to a table), or append specific fields.
- 2333 You must enter the name of the table you are creating or appending records to. You tried to define a make-table or append query without specifying a destination table.
- 2334 Microsoft Office Access can't print '|' because it is an action query. Because action queries don't produce a recordset, you can't print a Datasheet view of them. Note that an exclamation point (!) joined to a query icon in the Navigation Pane marks an action query. To print a Datasheet view of the records that will be selected by the query, display the query in Design view, click the Datasheet button, and then click the Print button.
- 2335 You must specify the same number of fields when you set the LinkChildFields and LinkMasterFields properties. You entered a different number of fields for one property than you did for the other. If you use the Relationships command (on the Database Tools tab, click Relationships) to define a relationship between the tables underlying the form and subform, Microsoft Office Access will link the form and subform automatically and then set the LinkChildFields and LinkMasterFields properties.
- 2337 You can't specify criteria on the same field for which you entered Value in the Crosstab row. You tried to display a crosstab query after entering Value in the Crosstab row and criteria in the Criteria row. If you want this field to supply the cross-tabulated values in the crosstab query, delete the entry in the Criteria row. If you want this to be a criteria field, leave the Crosstab row blank.
- 2338 Microsoft Office Access truncated the expression you entered. The expression '|' exceeds the 1,024-character limit for the query design grid.
- 2339 Microsoft Office Access can't create a temporary link. You reached the limit for the number of links in your database. Microsoft Office Access needs to create a temporary link in order to import your ODBC table. Remove all unneeded links or tables.
- 2340 The expression you entered exceeds the 1,024-character limit for the query design grid.
- 2342 A RunSQL action requires an argument consisting of an SQL statement. For example, an action query that appends records starts with INSERT INTO. A data-definition query that creates a table starts with CREATE TABLE.
- 2343 The value you entered exceeds the Alias property's 64-character limit.
- 2344 For the TopValues property in the query property sheet, you must enter an integer greater than zero.
- 2345 For the TopValues property in the query property sheet, you must enter a percentage from 1 through 100.
- 2346 For the TopValues property in the query property sheet, you must enter a number greater than zero.
- 2347 Microsoft Office Access can't find the file name you entered for the DestinationDB property in an action query's property sheet. You may have misspelled the database file name, or the file may have been deleted or renamed.
- 2348 You can't leave the Alias property blank.
- 2349 For the TopValues property in the query property sheet, you must enter a number smaller than 2,147,483,647.
- 2350 Microsoft Office Access can't save the query. The query is a pass-through query and can't be represented as a simple SQL string. Save the query as a named query from the Query Builder. When you close the Query Builder, Microsoft Office Access will fill the RecordSource or RowSource property with the saved query name. Make sure the query doesn't have an SQL syntax error.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2351 Microsoft Office Access can't represent an implicit VALUES clause in the query design grid. @Edit this in SQL view. @1@@@1
- 2352 You can't modify this query because it has been deleted or renamed by another user. @@@1@@@1
- 2353 Bad query parameter '|'. @@@1@@@1
- 2354 This query or table has an expression that is failing to evaluate.
- 2355 You can select up to | values in a column filter for a multi-valued field. Remove some values, and then try again.
- 2356 You cannot assign a multivalued or Attachment field to the Link Master Fields or Link Child Fields properties. @@@1@@@1
- 2360 A field name is missing. @You have defined a data type or a description for a field without specifying the field name. @Enter a name for the field, or delete the row. @1@@@1
- 2361 Microsoft Office Access can't save this table. @There are no fields in this table. @Define at least one field by entering a field name and selecting a data type. @1@@@1
- 2362 You already have a field named '|'. @@@1@@@1
- 2363 Microsoft Office Access allows only one AutoNumber field per table. @Use the Number data type for similar fields. @1@@@1
- 2364 Microsoft Office Access can't open the table in Datasheet view. @@@1@@@1
- 2366 Microsoft Office Access was unable to save the field ordering. All other changes were saved successfully. @Click the Microsoft Office Button, point to Manage, and then click Compact and Repair Database. @1@@@1
- 2370 Removing or changing the index for this field would require removal of the primary key. @If you want to delete the primary key, select that field and click the Primary Key button. @1@@@1
- 2371 Microsoft Office Access can't create a primary key. Your changes weren't saved. @@@1@@@1
- 2372 The field name is not valid. @Make sure that the name doesn't contain a period (.), exclamation point (!), bracket ([]), leading space, or non-printable character such as a carriage return. If you have pasted the name from another application, try pressing ESC and typing the name again. @2@1@13793@1
- 2373 The setting for the FieldSize property must be from 0 through 255. @@@1@@@1
- 2374 You can't create an index or primary key on more than 10 fields. @@@1@@@1
- 2375 You can't paste beyond the end of a table. @You have attempted to paste fields beyond the 255th row in a table in Design view. @1@@@1
- 2376 Microsoft Office Access can't create a primary key. @You have selected too many fields for a multiple-field primary key. @1@@@1
- 2377 Once you enter data in a table, you can't change the data type of any field to AutoNumber, even if you haven't yet added data to that field. @Add a new field to the table, and define its data type as AutoNumber. Microsoft Office Access then enters data in the AutoNumber field automatically, numbering the records consecutively starting with 1. @1@@@1
- 2378 This table is read-only. @Use a different name in the Save As dialog box to save your changes. @1@@@1
- 2379 You can't create a primary key on a field of this data type. @You can't define a primary key on fields with an OLE Object, Memo, Attachment, or Multi-valued lookup field. @1@@@1
- 2380 Microsoft Office Access can't create a primary key because no fields have been selected. @You have selected a row with no fields defined. @Place the insertion point somewhere in the row of the field you want to define as the primary key. @1@@@1
- 2381 Microsoft Office Access can't create a primary key because the field doesn't have a name. @Name the field, and then define it as a primary key field. @1@@@1

- 2422 The expression you entered has an invalid string. @A string can be up to 2048 characters long, including opening and closing quotation marks. @1@@@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2423 The expression you entered has an invalid . (dot) or ! operator or invalid parentheses. You may have entered an invalid identifier or typed parentheses following the Null constant.
- 2424 The expression you entered has a field, control, or property name that Microsoft Office Access can't find.
- 2425 The expression you entered has a function name that Microsoft Office Access can't find.
- 2426 The function you entered can't be used in this expression. You may have used a DoEvents, LBound, UBound, Spc, or Tab function in an expression. You may have used an aggregate function, such as Count, in a design grid or in a calculated control or field.
- 2427 You entered an expression that has no value. The expression may refer to an object that has no value, such as a form, a report, or a label control.
- 2428 You entered an invalid argument in a domain aggregate function. A field in the string expression may not be in the domain. A field specified in the criteria expression may not be in the domain.
- 2429 The In operator you entered requires parentheses.
- 2430 You did not enter the keyword And in the Between...And operator. The correct syntax is as follows: Expression [Not] Between value1 And value2
- 2431 The expression you entered contains invalid syntax. You may have entered a comma without a preceding value or identifier.
- 2432 The expression you entered contains invalid syntax, or you need to enclose your text data in quotes. You may have entered an invalid comma or omitted quotation marks. For example, if the Default Value property of a text field is "Huey, Louie, and Dewey," it must be enclosed in quotes if you mean it as a literal text string. This avoids the confusion with the expression "Huey Louie" And "Dewey".
- 2433 The expression you entered contains invalid syntax. You may have entered an operator, such as the + operator, in an expression without a corresponding operand.
- 2434 The expression you entered contains invalid syntax. You may have entered an operand without an operator.
- 2435 The expression you entered has too many closing parentheses.
- 2436 The expression you entered is missing a closing parenthesis, bracket (]), or vertical bar (|).
- 2437 The expression you entered has invalid vertical bars (|).
- 2438 The expression you entered contains invalid syntax. You omitted an operand or operator, you entered an invalid character or comma, or you entered text without surrounding it in quotation marks.
- 2439 The expression you entered has a function containing the wrong number of arguments.
- 2440 You must enclose IIf function arguments in parentheses.
- 2442 The expression you entered has invalid parentheses. You may have used the parenthesis syntax for an identifier in a query. Use the standard identifier syntax: Forms![Form]![Control].
- 2443 You can use the Is operator only in an expression with Null or Not Null.
- 2445 The expression you entered is too complex.
- 2446 There isn't enough memory available to perform this calculation. Close unneeded programs, and try again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2447 There is an invalid use of the . (dot) or ! operator or invalid parentheses. You may have entered an invalid identifier or typed parentheses following the Null constant.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2448 You can't assign a value to this object. The object may be a control on a read-only form. The object may be on a form that is open in Design view. The value may be too large for this field.
- 2449 There is an invalid method in an expression. For example, you may have tried to use the Print method with an object other than Report or Debug.
- 2450 Microsoft Office Access can't find the form '!' referred to in a macro expression or Visual Basic code. The form you referenced may be closed or may not exist in this database. Microsoft Office Access may have encountered a compile error in a Visual Basic module for the form.
- 2451 The report name '!' you entered is misspelled or refers to a report that isn't open or doesn't exist.
- 2452 The expression you entered has an invalid reference to the Parent property. For example, you may be using the Parent property with a control on a main form or report rather than with a control on a subform or subreport.
- 2453 The control name '!' you entered in your expression is misspelled or refers to a control on a form or report that isn't open or doesn't exist.
- 2454 The object name '!' you entered following the ! operator in the expression is invalid. For example, you may have tried to enter an identifier with two control names separated by the ! operator.
- 2455 You entered an expression that has an invalid reference to the property |. The property may not exist or may not apply to the object you specified.
- 2456 The number you used to refer to the form is invalid. Use the Count property to count the open forms and make sure that the form number is not greater than the number of open forms minus one.
- 2457 The number you used to refer to the report is invalid. Use the Count property to count the open reports and make sure that the report number is not greater than the number of open reports.
- 2458 The control number you specified is greater than the number of controls. Use the Count property to count the controls on the form or report and then check that the control number you cite is within the range of existing controls.
- 2459 You can't refer to the Parent property of a form or report when either is open in Design view.
- 2460 You can't refer to the RecordsetClone property of a form open in Design view.
- 2461 Use a section number, not a string, to refer to a form or report section.
- 2462 The section number you entered is invalid.
- 2463 Use a number, not a string, to refer to a group level.
- 2464 There is no sorting or grouping field or expression defined for the group level number you used. A valid group level number can be from 0 (for the first field or expression you sort or group on) through 9 (for the tenth). Count the group levels in the report starting with zero.
- 2465 Microsoft Office Access can't find the field '!' referred to in your expression. You may have misspelled the field name, or the field may have been renamed or deleted.
- 2466 The expression you entered has an invalid reference to the Dynaset property. For example, you may have used the Dynaset property with a form that isn't based on a table or query.
- 2467 The expression you entered refers to an object that is closed or doesn't exist. For example, you may have assigned a form to a Form object variable, closed the form, and then referred to the object variable.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2468 The value you entered for the interval, number, or date argument in the function is invalid. Check the argument to make sure that you entered it correctly. For more information on valid argument values, search the Help index for 'DatePart function,' 'DateAdd function,' or 'DateDiff function'.
- 2469 The expression you entered in the form control's ValidationRule property contains the error. Microsoft Office Access can't parse the ValidationRule expression you entered. For example, if you enter the expression =MyFunction() in the ValidationRule property, and the function MyFunction doesn't exist, Microsoft Office Access displays the following message: Unknown function name in validation rule: 'MyFunction'. To help you create expressions as arguments in Visual Basic, use the Expression Builder. For more information, search the Help index for 'Expression Builder'.
- 2470 There is a(n) '!' in the form control's ValidationRule property. To help you create expressions as arguments in Visual Basic, use the Expression Builder. For more information, search the Help index for 'Expression Builder'.
- 2471 The expression you entered as a query parameter produced this error: '!'.
- 2472 The LinkMasterFields property setting has produced this error: '!'.
- 2473 The expression you entered as the event property setting produced the following error: \* The expression may not result in the name of a macro, the name of a user-defined function, or [Event Procedure]. There may have been an error evaluating the function, event, or macro.
- 2474 The expression you entered requires the control to be in the active window. Try one of the following: Open or select a form or report containing the control. Create a new control in the active window, and try the operation again.
- 2475 You entered an expression that requires a form to be the active window.
- 2476 You entered an expression that requires a report to be the active window.
- 2477 You entered an invalid objecttype value '!' in an If TypeOf object Is objecttype condition of an If...Then...Else statement. The objecttype can be any one of the following: BoundObjectFrame, CheckBox, ComboBox, CommandButton, Label, Line, ListBox, UnboundObjectFrame, OptionButton, OptionGroup, PageBreak, Rectangle, Subform, Subreport, TextBox, ToggleButton, ImageControl, or OLEControl.
- 2478 Microsoft Office Access doesn't allow you to use this method in the current view. Most methods, including the SetFocus and Requery methods, can't be used in form or report Design view.
- 2479 The event procedure '!' can't be a Function procedure; it must be a Sub procedure. If you want to run a Function procedure when an event occurs, try one of the following: Set the event property to the name of a macro containing a RunCode action that runs the Function procedure. Set the event property to =FunctionName().
- 2480 You referred to a property by a numeric argument that isn't one of the property numbers in the collection. Check the property numbers in the collection.
- 2481 You can't set a value while a document is in Print Preview.
- 2482 Microsoft Office Access can't find the name '!' you entered in the expression. You may have specified a control that wasn't on the current object without specifying the correct form or report context. To refer to a control on another form or report, precede the control name with the name of a collection, usually either Forms or Reports, and the name of the form or report to which the control belongs. For example, Forms![Products]![Units In Stock].
- 2483 You can't move to a previous control when only one control has had the focus. Use the PreviousControl property only after you've moved the focus to a second control.
- 2484 There is no active datasheet.
- 2485 Microsoft Office Access can't find the object '!'.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2486 You can't carry out this action at the present time. You tried to run a macro or used the DoCmd object in Visual Basic to carry out an action. However, Microsoft Office Access is performing another activity that prevents this action from being carried out now. For example, no actions on a form can be carried out while Microsoft Office Access is repainting a control or calculating an expression. Carry out the action later.
- 2487 The Object Type argument for the action or method is blank or invalid. For a Close, GoToRecord, SearchForRecord or RepaintObject action, enter values for both arguments, or leave both blank to perform the action on the active object. For a DeleteObject, Rename, or CopyObject action, enter values for both arguments, or leave both blank to perform the action on the object currently selected in the Navigation Pane. For a SendObject or OutputTo action, enter values for both arguments, or leave the Object Name argument blank if you want the action performed on the active object of the specified object type. If you're using a method with the DoCmd object, use an intrinsic constant that equates to a valid object type or the corresponding numeric value for the argument name.
- 2488 You can't use the ApplyFilter action on this window. You tried to use the ApplyFilter action or method, but you didn't apply the filter to a table, query, form, or report. You may have applied the filter to a form, but the form wasn't open in Form or Datasheet view. You may have applied the filter to a report but didn't use the ApplyFilter action in a macro specified by the OnOpen property setting. Use the SelectObject action or method to select the table, query, form, or report before applying the filter.
- 2489 The object '!' isn't open. The macro you are running (directly or indirectly) contains a GoToRecord, RepaintObject, or SelectObject action, but the Object Name argument names an object that is closed. The objectname argument for the GoToRecord, RepaintObject, or SelectObject method names an object that is closed. Use one of the Open actions or methods to open the object so that you can carry out the desired action.
- 2491 The action or method is invalid because the form or report isn't bound to a table or query. You tried to use the ApplyFilter or SearchForRecord action or method. However, the form or report you applied the filter to is not based on a table or query, so the form or report doesn't have any records to apply a filter to. Use the SelectObject action or method to select the desired form or report before you run the ApplyFilter action. To base a form or report on a table or query, open the form or report in Design view, and enter the table or query name in the RecordSource property.
- 2492 Microsoft Office Access can't find the macro '!2' in the macro group '!1.' You used the macrogroupname.macroname syntax to specify a macro. You then tried to run the macro (directly or indirectly), or you used the RunMacro method to run the macro. However, the macro you specified isn't in this macro group. Create the macro in the macro group, specify the correct macro group, or specify the correct macro name.
- 2493 This action requires an Object Name argument.
- 2494 The action or method requires a Form Name argument. You tried to use the OpenForm action or method, but you left the Form Name argument blank. In the Form Name argument, enter the name of a form in the current database.
- 2495 The action or method requires a Table Name argument. You tried to use the OpenTable, TransferSpreadsheet, or TransferText action or method, but you left the Table Name argument blank. In the Table Name argument, enter the name of a table that is in the current database.
- 2496 The action or method requires a Query Name argument. You tried to use the OpenQuery action or method, but you left the Query Name argument blank. In the Query Name argument, enter a query name.
- 2497 The action or method requires a Report Name argument. You tried to use the OpenReport action or method, but you left the Report Name argument blank. In the Report Name argument, enter the name of a report.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2498 An expression you entered is the wrong data type for one of the arguments. You tried to run a macro or use a method to carry out an action, but an expression evaluated to the wrong data type. For example, for the Close method you specified a string for the Object Type argument, but this argument can be set only to certain intrinsic constants or their numeric equivalents.
- 2499 You can't use the GoToRecord or SearchForRecord action or method on an object in Design view. Try one of the following: Switch to Form or Datasheet view for a form. Switch to Datasheet view for a query or table. If you are running a macro or Visual Basic procedure containing an action that opens the object, set the View argument to the correct view before you carry out the GoToRecord action.
- 2500 You must enter a number greater than zero for a Repeat Count argument. You tried to use the RunMacro action or method, but you entered a value less than zero (or an expression that evaluates to less than zero) in the Repeat Count argument. To run the macro once, leave this argument blank.
- 2501 The | action was canceled. You used a method of the DoCmd object to carry out an action in Visual Basic, but then clicked Cancel in a dialog box. For example, you used the Close method to close a changed form, then clicked Cancel in the dialog box that asks if you want to save the changes you made to the form.
- 2502 The action or method requires a Macro Name argument. You tried to use the RunMacro action or method, but you left the Macro Name argument blank. Microsoft Office Access tried to create a custom menu bar for a form or report, but the Menu Macro Name argument of the AddMenu action is blank. In the Menu Macro Name argument, enter the name of a macro or macro group that is in the current database.
- 2503 You can't use this action with the DoCmd object. For a list of the actions that the DoCmd object doesn't support and some alternatives to using these actions, click Help. Why actions that aren't in this list can be used with the DoCmd object.
- 2504 The action or method requires at least | argument(s). You tried to run a macro containing an action or used a method or action with the DoCmd object, but you didn't set the required number of arguments. For example, if you use the MoveSize action, you must set at least one of the four arguments.
- 2505 An expression in argument | has an invalid value. You tried to run a macro or used the DoCmd object in Visual Basic. The argument number above is the position of the argument as it appears in the Macro window, the Action Failed dialog box, or the Object Browser (if you're using the DoCmd object). Try one of the following: Select a setting from the drop-down list box in each argument. Use an intrinsic constant equating to a valid object type. Substitute the correct corresponding expression.
- 2506 A value you entered for the Transfer Type argument is invalid. An expression in the Transfer Type argument doesn't evaluate to a valid numeric value. Valid values for the Transfer Type argument are as follows: 0, 1, and 2 for the TransferDatabase action. 0, 1, and 2 for the TransferSpreadsheet action. 0 through 6 for the TransferText action.
- 2507 The | type isn't an installed database type or doesn't support the operation you chose. You used the TransferDatabase method, but an expression in the databasetype argument doesn't evaluate to a valid database type for importing, exporting, or linking. For information on valid database types, click Help.
- 2508 A value you entered for the spreadsheettype argument is invalid. You used the TransferSpreadsheet method, and an expression in the spreadsheettype argument doesn't evaluate to a valid numeric value. Valid values are 0, 2, 3, 4, 5, 6, 7, and 8. Note that 1 is an invalid value; you can't import or export to a Lotus .wks format file.
- 2509 The setting for the Range argument can't be longer than 255 characters.
- 2510 The expression you entered in the Specification Name argument exceeds the 64-character limit. Select one of the existing specification names from the argument list box when you use the TransferText action in a macro, or enter a name in Visual Basic that follows Microsoft Office Access object-naming rules.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2511 The action or method requires a Specification Name argument. You tried to use the TransferText action or method and you specified a Transfer Type argument but left the Specification Name argument blank. In the Specification Name argument, enter an existing specification name from the argument list box. 11113131
- 2512 Microsoft Office Access can't parse the expression: '|'. Click OK to return to the action argument or conditional expression where this expression appears, and then correct the syntax. 1111
- 2513 The Macro Name argument can't be longer than 64 characters according to Microsoft Office Access object-naming rules. 11117341
- 2514 The action or method requires a Control Name argument. You tried to use the GoToControl action or method, but you left the control name blank. In the Control Name argument, enter a control or field name from the active form or datasheet. 11113131
- 2515 Microsoft Office Access can't open the macro '|' because it was saved using a different version of Microsoft Office Access. Re-create the macro in the current version of Microsoft Office Access. 1111
- 2516 Microsoft Office Access can't find the module '|'. You tried to use the OpenModule action or method, but Microsoft Office Access can't find the module you specified in the Module Name argument. Enter a valid module name from the current database. 1111
- 2517 Microsoft Office Access can't find the procedure '|'. \* You may have used the Run method in Visual Basic but entered an invalid procedure name, or you used the Run method without first opening a database. You tried to use the OpenModule action or method, but you used an invalid procedure name. 1111
- 2519 Application-defined or object-defined error
- 2520 The action or method requires a Module or Procedure Name argument. You tried to use the OpenModule action or method, but you didn't enter a name in either the Module Name or the Procedure Name argument in the Macro window. Enter a valid name in one of these arguments. 1111
- 2521 You have specified a Transfer Type that doesn't support the HTML Table Name argument. Leave the HTML Table Name argument blank unless you are using the Import HTML or Link HTML Transfer Types. 1111
- 2522 The action or method requires a File Name argument. You tried to use the TransferSpreadsheet or TransferText action or method. In the File Name argument, enter a file name. 11113131
- 2523 The value you entered for the show argument is invalid. You used the ShowToolbar method. Valid values for this argument are acToolbarYes, acToolbarWhereApprop, and acToolbarNo, or the corresponding numeric values 0, 1, and 2. 111124461
- 2524 Microsoft Office Access can't invoke the application using the RunApp action. The path to the application is invalid, or a component of the application is missing. Check the path in Windows Explorer or File Manager. 1111
- 2525 A macro can call itself a maximum of 20 times. Your macro contains a RunMacro action that calls the same macro more than 20 times. Use a condition to stop the macro after it has been run 20 times, or call another macro with the RunMacro action. 1111
- 2526 The SendKeys action requires the Microsoft Office Access Utility Add-in to be loaded. Rerun Microsoft Office Access or Microsoft Office Setup to reinstall Microsoft Office Access and the Microsoft Office Access Utility Add-in. 1111853091
- 2527 Lotus .wks file formats aren't supported in the current version of Microsoft Office Access. Convert your .wks file to a more recent format, such as .wk1. 1111
- 2528 The RunCommand macro action argument is missing, or you entered an invalid command ID for the RunCommand method. 1111
- 2529 The Toolbar argument can't be longer than 64 characters. 1111
- 2530 The SelectObject method can't be used on a report that is currently printing. 1111

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2531 Your HTML file does not contain any tabular data that Microsoft Office Access can import.
- 2532 Microsoft Office Access can't find the macro or sub procedure ' | '. The specified macro, macro group, or sub procedure doesn't exist. Note that when you enter the macrogroupname.macroname syntax in an argument, you must specify the name the macro's macro group was last saved under. Also, ensure that the referenced macro has been saved, or that the referenced sub procedure expects 0 arguments.
- 2533 The ApplyFilter action requires that either the Filter Name or Where Condition argument is set. You tried to run a macro containing an ApplyFilter action, but you didn't set the required arguments.
- 2534 The action or method requires a data access page Name argument. You tried to use the OpenDataAccessPage action or method, but you left the data access page Name argument blank. In the data access page Name argument, enter the name of a data access page in the current database.
- 2535 The ApplyFilter action contains a Filter Name that cannot be applied. The filter name is not a valid argument in the ApplyFilter action in Client Server.
- 2536 Application-defined or object-defined error
- 2537 The feature ' | ' is not available while the database is opened in disabled mode.
- 2538 The ' | ' macro action cannot be run in disabled mode.
- 2540 The file ' | ' you tried to replace is a Microsoft Office Access system file that is in use and can't be replaced or deleted.
- 2541 The contents of the Clipboard have been deleted and can't be pasted. Some applications do not put large objects on the Clipboard. Instead, they put a pointer to the object on the Clipboard. The pointer may vanish before the paste happens.
- 2542 Specify the database name in the command line so that Microsoft Office Access can find the macro.
- 2543 You can't paste a database object onto itself.
- 2544 Application-defined or object-defined error
- 2545 The CopyObject action requires you to specify a different destination database or a new name to copy from the current database. The macro you are running includes a CopyObject action. Open the macro in the Macro window, and select the CopyObject action. Enter a destination database or a new name in the appropriate argument box.
- 2546 Select a database object in the Navigation Pane before you run the macro containing the | action.
- 2547 The database ' | ' you tried to delete and replace is read-only and can't be deleted or replaced. Enter a different name for the new database.
- 2548 Microsoft Office Access can't run the Security Wizard because this database is open in exclusive mode. Do you want Microsoft Office Access to open the database in shared mode and run the Security Wizard?
- 2549 Microsoft Office Access can't delete |1 after compacting it. The compacted database has been named |2. If you compact a database using the same name, Microsoft Office Access creates a new compacted database and then deletes the original database. In this case, however, the original database wasn't deleted because it is read-only. If you can, remove the read-only status, delete the original database, and then rename the new database using the original name. If you can't remove the read-only status, inform your workgroup administrator.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2550 Microsoft Office Access can't delete |1 after encoding it. The encoded database has been named |2. @If you encode a database using the same name, Microsoft Office Access creates a new encoded database, and then deletes the original database. In this case, however, the original database can't be deleted because it is read-only. @If you can, remove the read-only status, delete the original database, and then rename the new database using the original name. If you can't remove the read-only status, inform your workgroup administrator. @1@1@10299@1
- 2551 Microsoft Office Access can't delete |1 after decoding it. The decoded database has been named |2. @If you decode a database using the same name, Microsoft Office Access creates a new decoded database, and then deletes the original database. In this case, however, the original database can't be deleted because it is read-only. @If you can, remove the read-only status, delete the original database, and then rename the new database using the original name. If you can't remove the read-only status, inform your workgroup administrator. @1@1@10299@1
- 2552 You can't encode a database that you didn't create or don't own. @See the owner of the database or your workgroup administrator. @@1@@@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2572 This database is in an unexpected state and Microsoft Office Access cannot open it. @This database has been converted from a prior version of Microsoft Office Access by using the DAO CompactDatabase method instead of the Convert Database command (click the Microsoft Office Button and then click Convert). Converting by using the DAO CompactDatabase method has left the database in a partially converted state. @If you have a copy of the database in its original format, click the Microsoft Office Button and then click Convert to convert it. If the original database is no longer available, create a new database and import your tables and queries to preserve your data and try again. Your other database objects cannot be recovered. @1@@@1
- 2573 This database is a replica created in a different version of Access. @You can only convert this replica by synchronizing with its Design Master. @Convert the Design Master of this replica set then synchronize the replica with the Design Master. @1@@@1
- 2574 You can't create another Microsoft Office Access database with the same name and location as an existing database. @You carried out the Make MDE File command, but tried to give the new database the same extension as the old one. @Accept the default .mde extension for your new MDE database. @1@@@1
- 2575 You can't create a Microsoft Office Access MDE database from a database replica. @@@1@@@1
- 2576 This database is a Microsoft Office Access 7.0/8.0/9.0 Design Master/Replica. @If you click OK, the database you selected will be renamed to |1 and then converted to |2. Everyone using a replica of this database will have to upgrade to Microsoft Access 2000 after the next synchronization. @4@@@2
- 2577 The database | is already open. @Close the database before carrying out the Make MDE File command. @1@@@1
- 2578 Microsoft Office Access was unable to create the .accde, .mde, or .ade file. @@@1@@@1
- 2579 Local forms, reports, macros, and modules in this replica will not be converted. @To retain these objects, please be sure to import them into the Design Master from the original replica. @1@@@1
- 2580 The record source '|' specified on this form or report does not exist. @The name of the recordsource may be misspelled, the recordsource was deleted or renamed, or the recordsource exists in a different database. @In the Form or Report's Design view, display the property sheet by clicking the Properties button, and then set the RecordSource property to an existing table or query. @1@@@1
- 2581 You must define a sort field or expression for the group header or footer in the report you tried to preview or print. @@@1@1@8753@1
- 2582 You cannot set the GroupInterval property to 0 when the GroupOn property is set to Interval. @Click the Sorting and Grouping Design tab and try one of the following:  Change the GroupInterval property setting to a number higher than 0.  Change the GroupOn property setting to Each Value. @1@@@1
- 2583 The ApplyFilter action or method can be carried out only from an Open macro or Open event procedure. @\* You may have tried to run a macro or procedure containing the ApplyFilter action or method from a report property other than the OnOpen property.  You may have tried to run a macro or event procedure on a report that is already open. @To use the ApplyFilter action in a report, set the OnOpen property to the name of the macro, close the report, and then reopen it. @1@1@3004@1
- 2584 You can't use aggregate functions in a page header or footer. @The page header or footer of the report you tried to preview contains a calculated control with an aggregate function in its expression. @If you want to show the result of an aggregate function in a page header or footer, create a hidden calculated control in an appropriate section of the report. Then create an unbound text box in the page header or footer.  You are running a macro, use the SetValue action to set the unbound text box value to the value in the hidden control. @1@1@11839@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2585 This action can't be carried out while processing a form or report event. A macro specified as the OnOpen, OnLoad, OnClose, OnFormat, OnRetreat, OnPage, or OnPrint property setting contains an invalid action for the property. When you click OK, an Action Failed dialog box will display the name of the macro that failed and its arguments. 111909
- 2586 Microsoft Office Access changed the MoveLayout and NextRecord properties to True from False. The macro or Visual Basic function run by the OnFormat property of one of the sections of the report set both the MoveLayout and NextRecord properties to False. Having both properties set to False can make the report print continuously. Revise the macro or function so that it sets these properties to the values you want. 114656
- 2587 Microsoft Office Access can't complete the Output operation. The Visual Basic code you entered contains a syntax error or the Output procedures are not available. Make sure there isn't a syntax error in your code. If the syntax is correct, run Setup to reinstall Microsoft Office Access. If you want to preserve your security or custom settings, back up the Microsoft Office Access workgroup information file. For information on backing up files, search the Microsoft Windows Help index for 'backing up files'. 1185309
- 2588 You must select a form to save as a report. 11
- 2589 The expression '|' is invalid. Aggregate functions are only allowed on output fields of the Record Source. 11
- 2590 The Var and VarP aggregate functions are not supported in an Access project. 11
- 2591 You can't change printer properties in the OnOpen event of a report. 11
- 2592 Application-defined or object-defined error
- 2593 This feature is not available in an MDB or ACCDB. 11
- 2594 You cannot Filter By Form when form record source is a recordset object. 11
- 2595 Microsoft Office Access cannot set this property when DefaultSize property is set to True. 11
- 2596 Printer object is not available on subforms and subreports. 11
- 2597 Unable to bind the report to the specified recordset because the shape does not match the sorting and grouping specified on the report. 11
- 2598 Application-defined or object-defined error
- 2599 Report view is not available for this report. 11
- 2600 Verify the new password by retyping it in the Verify box and clicking OK. 11
- 2601 You don't have permission to read '|'. To read this object, you must have Read Design permission for it. For more information on permissions and who can set them, click Help. 2110222
- 2602 You don't have permission to modify '|'. To modify this object, you must have Modify Design permission for it. If the object is a table, you must also have Delete Data and Update Data permissions for it. For more information on permissions and who can set them, click Help. 2110222
- 2603 You don't have permission to run '|'. To run this object, you must have Open/Run permission for it. For more information on permissions and who can set them, click Help. 2110222
- 2604 You can't view this object's permissions. To view or change permissions for this object, you must have Administer permission for it. For more information on permissions and who can set them, click Help. 2110222
- 2605 You can't remove this user account from group '|'. \* You may have tried to remove a user account from the default Users group. Microsoft Office Access automatically adds all users to the default Users group. To remove a user account from the Users group, you must first delete the account. You may have tried to remove all users from the Admins group. There must be at least one user in the Admins group. 1110212
- 2606 The object type is invalid. 11

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2627 There's not enough disk space.
- 2628 One of your parameters is invalid.
- 2629 Could not open workgroup file. This is a directory.
- 2630 The specified path is invalid.
- 2631 The specified path is too long.
- 2632 Change Workgroup cannot proceed without your Name, PIN, and a path to the new Workgroup Information File.
- 2633 Microsoft Office Access cannot change the password for the logon account '|' because the current connection is using Microsoft Windows NT integrated security.
- 2634 The new password doesn't match the verify password value.
- 2635 Microsoft Office Access is unable to change the password because the old password doesn't match the password of the currently logged in user.
- 2636 Workgroup file already exists.
- 2637 Unable to start SQL Server service. To restart the SQL Server service, double-click the SQL Server System Manager icon in the system tray and click Start/Continue. When the service is started, in Microsoft Office Access, click the Microsoft Office Button, point to Server Tasks, click Connection, and then click OK.
- 2638 Unable to start SQL Server service. To restart the SQL Server service, double-click the SQL Server System Manager icon in the system tray and click Start/Continue. If the service fails to start, go to the Services console and verify that the MSSQLServer service Log On information is correct. When the service is started, in Microsoft Office Access, click the Microsoft Office Button, point to Server Tasks, click Connection, and then click OK.
- 2639 Microsoft Office Access cannot open | due to security restrictions. Security settings restrict access to the file because it is not digitally signed.
- 2646 Microsoft Office Access can't create this relationship and enforce referential integrity. Data in the table '|' violates referential integrity rules. For example, there may be records relating to an employee in the related table, but no record for the employee in the primary table. Edit the data so that records in the primary table exist for all related records. If you want to create the relationship without following the rules of referential integrity, clear the Enforce Referential Integrity check box.
- 2648 Application-defined or object-defined error
- 2649 Microsoft Office Access can't enforce referential integrity for this relationship. Make sure the fields you drag are primary key fields or uniquely indexed and that the unique index or primary key is correctly set. If you want to create the relationship without following the rules of referential integrity, clear the Enforce Referential Integrity check box.
- 2650 Microsoft Office Access can't create this relationship and enforce referential integrity. \* The fields you chose may have different data types. The fields may have the Number data type but not the same FieldSize property setting. Try one of the following: Select fields with the same data type. Open the tables in Design view, and change the data types and field sizes so that the fields match. If you want to create the relationship without following the rules of referential integrity, clear the Enforce Referential Integrity check box.
- 2651 You can't create a relationship between fields with the Memo, OLE Object, Yes/No, or Hyperlink data type. You tried to enforce referential integrity for a relationship, but one or more of the fields you chose have the Memo, OLE Object, Yes/No, or Hyperlink data type. Select fields in the grid that don't have these data types, or open the tables in Design view and change data types.
- 2652 You can't delete a relationship inherited from a linked database.
- 2680 The form or report includes more OLE objects than Microsoft Office Access can display at one time. Delete some of the bound or unbound object frames.
- 2683 There is no object in this control.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2684 The OLE object is empty. You can't edit a bound object frame if the field in the underlying table doesn't contain an OLE object. Right-click the field, click Insert Object, and use the dialog box to locate and add the object to the field.
- 2685 The object doesn't have an OLE object data type. The bound object frame containing the object you tried to edit isn't bound to a field with the OLE object data type. If you want to display an OLE object, set the ControlSource property for the bound object frame to a field with the OLE object data type. Or use a different control, such as a text box, to display the data.
- 2686 Microsoft Office Access is unable to save the object. Your computer ran out of disk space while Microsoft Office Access was saving the OLE object. For information on freeing disk space, search the Microsoft Windows Help index for 'disk space, freeing'.
- 2687 Application-defined or object-defined error
- 2690 A system resource necessary for displaying the object isn't available. Your computer may be low on memory. Close unneeded programs, and try the operation again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2691 Microsoft Office Access can't communicate with the OLE server. The OLE server may not be registered. To register the OLE server, reinstall it.
- 2694 The Clipboard isn't available. The Clipboard may be in use by another application, or your computer may be low on memory. If your computer is low on memory, close unneeded programs, and then try the operation again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2695 Microsoft Office Access is unable to display the converted object. Delete the object in the bound object frame, and then re-create it.
- 2696 Microsoft Office Access can't read the OLE object. Delete the object in the bound object frame, and then re-create it.
- 2697 There was a problem loading the object. The object you tried to create or edit is not a valid OLE object. Re-create the object, and then embed or link it again.
- 2698 The object you tried to create or edit is too large to save. Your database may not contain enough space for the object. Your computer may be out of disk space. For information on freeing disk space, search the Microsoft Windows Help index for 'disk space, freeing'.
- 2699 The connection with the OLE server was lost, or the OLE server encountered an error while you were using it. Restart the OLE server, and then try the operation again.
- 2700 Microsoft Office Access can't find an OLE server or a dynamic-link library (DLL) required for the OLE operation. The OLE server or DLL may not be registered. To register the OLE server or DLL, reinstall it.
- 2701 The OLE server for the OLE object you tried to create is already open. Switch to the OLE server window and close it. Then try to create or edit the OLE object again.
- 2702 The object isn't registered. The object may be calling an application that isn't installed. To register the application, reinstall it.
- 2703 Microsoft Office Access can't read the object because communication was interrupted. If the OLE server application is located on a network server, make sure your computer is connected to it.
- 2704 The object you tried to edit doesn't have any displayable information.
- 2707 Microsoft Office Access can't open the file containing the OLE object. You may have specified an invalid file name or an invalid unit of data (such as a range of cells from a worksheet) within the file for the OLE object. The file you specified may not be available because it's locked by another user or you don't have permission to use it. Try one of the following: Make sure the file is available and that you used the correct file name. Check the OLE server's documentation for information about the syntax to use when specifying an OLE object's data.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2711 The file name argument in the GetObject function of the Visual Basic procedure you ran is invalid. You may not have entered, or may have misspelled, the file name. The unit of data (such as a range of cells from a worksheet) may not be valid. Try one of the following: Make sure the file is installed on your computer and that you used the correct file name. Check the OLE server's documentation for information about the syntax to use when specifying an OLE object's data.
- 2713 A problem occurred when Microsoft Office Access tried to access the | object. You may have specified an invalid file name or an invalid unit of data (such as a range of cells from a worksheet) within the file for the OLE object. The file you specified may not be available because it's locked by another user or you don't have permission to use it. Try one of the following: Make sure that the file is installed on your computer and that you used the correct file name. Check the OLE server's documentation for information about the syntax to use when specifying an OLE object's data.
- 2714 The | object doesn't support verbs that can be performed on an OLE object, such as play or edit. Check the OLE server's documentation for information on the verbs the OLE object supports, or use the ObjectVerbs property or the ObjectVerbsCount property to find the verbs supported by an OLE object.
- 2715 The index for the Action or the Verb property for the | object is invalid. The setting you entered may be a negative number or may be too large.
- 2717 The | object has no information that can be displayed. You tried to perform an operation on a bound or unbound object frame containing an OLE object, but the OLE object is empty. Right-click the frame, click Insert Object, and then use the dialog box to locate and either add or link to an object from a file that is not empty.
- 2719 A problem occurred while accessing the | object. The OLE server may not be available because it's on a network server and you lost the connection. Try re-establishing the connection. The OLE object may be stored in a linked file, but the file isn't available. Activate the OLE server outside of Microsoft Office Access, and then open the file containing the OLE object to verify that it still exists and can be accessed.
- 2723 The | object doesn't support the attempted operation. The OLE object was changed to a picture, or the link to the object was broken. If you want to perform the operation, delete the OLE object, and then embed or link it again.
- 2724 One or more dynamic-link libraries required for using OLE objects is an incorrect version. Run Setup to reinstall Microsoft Office Access. If you want to preserve your security or custom settings, back up the Microsoft Office Access workgroup information file. For information on backing up files, search the Microsoft Windows Help index for 'backing up files'.
- 2725 The OLE server isn't registered. To register the OLE server, reinstall it.
- 2726 Microsoft Office Access can't perform the OLE operation because it was unable to read the Windows Registry where the OLE server is registered. Reinstall the OLE server, and then try the operation again. If problems continue, reinstall Microsoft Windows and the other applications on your computer. If you reinstall Microsoft Office Access, you may want to back up your Microsoft Office Access workgroup information file first to preserve any custom settings. For information on backing up files, search the Microsoft Windows Help index for 'backing up files'. For information on the Windows Registry, search the Microsoft Windows Help index for 'registry'.
- 2727 Microsoft Office Access can't perform the OLE operation because it was unable to write to the Windows Registry where the OLE server is registered. Reinstall the OLE server, and then try the operation again. If problems continue, reinstall Microsoft Windows and the other applications on your computer. If you reinstall Microsoft Office Access, you may want to back up your Microsoft Office Access workgroup information file first to preserve any custom settings. For information on backing up files, search the Microsoft Windows Help index for 'backing up files'. For information on the Windows Registry, search the Microsoft Windows Help index for 'registry'.
- 2729 The OLE object you tried to edit is busy. Try again later.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2730 There was a problem communicating with the OLE server. Try again later. If you still can't access the object, try one or more of the following:
- Free up system memory. For information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
  - Reinstall the OLE server to make sure it's registered.
  - Check the OLE server's documentation for information about the syntax to use when specifying an OLE object's data.
- 2731 An error occurred while accessing the OLE server. The OLE server may not be registered. To register the OLE server, reinstall it.
- 2732 Microsoft Office Access can't read the | object. Communication between Microsoft Office Access and the OLE server was interrupted. Make sure your computer is connected to the network server on which the OLE server is located.
- 2733 The OLE object you tried to edit can't be accessed. You don't have permission to change the object, or another user opened and locked the object.
- 2734 You can't save the | object now. The OLE server is running an operation, or another user opened and locked the object. Try to save the object again later.
- 2735 This disk is write-protected. You can't save the | object to it.
- 2737 Microsoft Office Access can't find the file containing the linked OLE object you tried to update using the OLE/DDE Links command. You may have misspelled the file name, or the file may have been deleted or renamed. If the file has been moved to a different location, use the OLE/DDE Links command to change the source. Or delete the object, and create a new linked object.
- 2738 There isn't enough memory to complete the operation. Close unneeded programs and try the operation again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2739 An error occurred during the operation with an OLE object. The object is in use.
- 2741 Your computer ran out of disk space while Microsoft Office Access was saving the changes you made to the | object. For information on freeing disk space, search the Microsoft Windows Help index for 'disk space, freeing'.
- 2742 Microsoft Office Access was unable to create more files. Your computer may be low on memory or disk space. Close unneeded programs and try the operation again. For information on freeing memory or disk space, search the Microsoft Windows Help index for 'memory, troubleshooting' or 'disk space, freeing'.
- 2743 The | object is stored in a format that is incompatible with the version of OLE on your computer.
- 2744 Microsoft Office Access can't find the OLE server. The setting for the SourceDoc property may be invalid, or the file may have been deleted, renamed, or moved.
- 2745 Share.exe or Vshare.386 is missing from your computer; OLE support needs these files to work correctly. Rerun Microsoft Office Access or Microsoft Office Setup to reinstall Microsoft Office Access, the Share program, and Vshare.386. If you want to preserve your security or custom settings, back up the Microsoft Office Access workgroup information file. Then restore the file to its original location. For information on backing up files, search the Microsoft Windows Help index for 'backing up files'.
- 2746 You can't switch to Design view because your form contains too many OLE objects. Close other applications, close the form, and then open the form again in Design view. Then delete some of the OLE objects or move them to a different form.
- 2747 The OLE server can't display the | object. There is a problem with the file containing the OLE object, or there isn't enough memory available. Open the OLE server outside of Microsoft Office Access, and then open the OLE object file. If you can do this, then your computer may be low on memory. Close other programs, and then try the operation again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2764 The object's property or method can't be set. You tried to run a Visual Basic procedure to set a property or apply a method for an object. However, the property or method doesn't support named arguments. Check the component's documentation for information on the properties and methods it makes available to Automation operations.
- 2765 Visual Basic can't convert the data type of one of the arguments you entered. You tried to run a Visual Basic procedure that executes a method or sets a property of an object. Check the component's documentation for information on the properties and methods it makes available for Automation operations.
- 2766 The object doesn't contain the Automation object '|'. You tried to run a Visual Basic procedure to set a property or method for an object. However, the component doesn't make the property or method available for Automation operations. Check the component's documentation for information on the properties and methods it makes available for Automation operations.
- 2767 The object doesn't support American English; it was developed using a different language. Use a version of the object developed in Visual Basic that supports the language you are using.
- 2768 The number you used to reference an element in the array is outside the bounds of the array. For example, the array is from 0 through 10, and you entered a -1 or an 11. Check the component's documentation for information on the properties and methods it makes available for Automation operations.
- 2769 A property of the Automation object requires or returns a data type that isn't supported by Visual Basic. You tried to run a Visual Basic procedure that references an Automation object's property. However, the value of the property isn't supported by Visual Basic. Check the component's documentation for information on the properties and methods it makes available for Automation operations.
- 2770 The object you referenced in the Visual Basic procedure as an OLE object isn't an OLE object.
- 2771 The bound or unbound object frame you tried to edit does not contain an OLE object. Right-click the frame, click Insert Object, and then use the dialog box to locate and either add or link to an object from a file that is not empty.
- 2774 The component doesn't support Automation. You tried to run a Visual Basic procedure that references an Automation object. Check the component's documentation for information on whether it supports Automation.
- 2775 You specified too many arguments in the Visual Basic procedure, or there isn't enough memory to run the procedure. Specify fewer arguments, or close unneeded programs, and then try to run the procedure again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 2777 The class argument in the CreateObject function of the Visual Basic procedure you're trying to run is invalid. Try one of the following:
- Make sure the file is installed on your computer and that you used the correct file name.
  - Check the OLE server's documentation for information about the syntax to use when specifying an OLE object's data.
- 2778 Microsoft Office Access tried to create an OLE link, but there was no source document for this object.
- 2782 You must specify a property or method for the object. You tried to run a Visual Basic procedure that references and sets a property or method for the object. Enter a property or method for the object.
- 2783 You entered an invalid setting for the Action property. Use one of the Microsoft Office Access intrinsic constants for the Action property. For a list of valid settings you can use with the Action property, click Help.
- 2784 The path you entered for the SourceDoc property setting for a linked OLE object is too long. Move the file to a location with a shorter path.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 2785 The OLE server wasn't able to open the object. The OLE server may not be installed. You may have specified an invalid setting for the SourceDoc or SourceItem property in a property sheet, a macro, or a Visual Basic procedure. To see the valid settings for either of these properties, search the Help index for the property topic.
- 2786 The OLE server doesn't support linking. You tried to run a Visual Basic procedure using the Action property. However, you provided insufficient information to establish a link.
- 2788 The object isn't a linked object. The property you tried to set in Visual Basic applies only to linked objects.
- 2790 You can't embed an OLE object into a bound or unbound object frame if the OLETypeAllowed property for the bound or unbound object frame is set to Linked. Insert a linked object, or set the OLETypeAllowed property to Embedded or Either, and then embed the object.
- 2791 Microsoft Office Access can't link the OLE object or the bound or unbound object frame. The OLETypeAllowed property for the bound or unbound object frame is set to Embedded. Embed the object, or set the OLETypeAllowed property to Linked or Either, and then link the object.
- 2792 You can't save a locked OLE object.
- 2793 Microsoft Office Access can't perform the operation specified in the Action property of the Visual Basic procedure you're trying to run. The object frame may be locked or disabled. Set the Locked property to No and the Enabled property to Yes.
- 2794 The ActiveX control you tried to insert isn't registered. For information on registering an ActiveX control, click Help.
- 2797 This OLE object was created in an earlier version of OLE so it can't be displayed as an icon. For an effect similar to displaying an object as an icon, add an image control to your form, and add the icon for the application to the image control. Then set the image control's OnDbClick property to a Visual Basic procedure that opens the OLE object.
- 2798 You can't use the Action property to delete a bound OLE object from its underlying table or query. You tried to run a Visual Basic procedure that deletes the object in a bound object frame by setting the Action property to acOLEDelete. Delete the object in a different way, such as with the DAO Delete method in Visual Basic.
- 2799 The OLE object can't be activated upon receiving the focus. If you selected an OLE object or a chart, and the AutoActivate property for that control is set to GetFocus, the OLE object or chart should be activated automatically when it receives the focus. However, the ActiveX component doesn't support this operation. Check the component's documentation for information on the properties and methods it makes available to Automation operations.
- 2800 This object is locked. Any changes you make will be discarded when the form is closed. Click the Microsoft Office Button, point to Save As, and save the object under a different name.
- 2801 The OLE object isn't loaded because the unbound ActiveX control hasn't been initialized.
- 2802 You can't insert an ActiveX control in a bound or unbound object frame. ActiveX controls are automatically contained in ActiveX control frames.
- 2803 You don't have the license required to use this ActiveX control. You tried to open a form containing an OLE object or an ActiveX control or you tried to create an ActiveX control. To obtain the appropriate license, contact the company that provides the licensed OLE object or ActiveX control.
- 2804 You can't create an ActiveX control in an unbound object frame. ActiveX controls are automatically contained in ActiveX control frames.
- 2805 There was an error loading an ActiveX control on one of your forms or reports. Make sure all the controls that you are using are properly registered. For information on registering an ActiveX control, click Help.

2806	Microsoft Office Access doesn't support this ActiveX control.
2807	You can't paste this object as the type you specified. Choose another object type.
2808	Microsoft Office Access can't find the Active Accessibility dynamic-link library (DLL) OleAcc. Rerun the Microsoft Office Access Setup program.
2809	Application-defined or object-defined error
2811	Microsoft Office Access is unable to create the data access page.
2812	The path specified was invalid, or may be too long. Please check the path and ensure it is correct.
2813	The file could not be opened. It may currently be in use.
2814	Unable to save the file.
2815	Unable to save the file to an alternate location.
2816	Unable to close the file.
2817	Microsoft Office Access is unable to save (or send) the data access page.
2818	Microsoft Office Access is unable to retrieve the file:  . Either the file is not available, or you do not have enough disk space to copy the file.
2819	Microsoft Office Access is unable to open the data access page.
2820	Microsoft Office Access is unable to change the BASE HREF for your document.
2821	File in use
2822	Microsoft Office Access encountered an unexpected error while attempting to recover from a failed save (or send). Your data access page may not be in a usable state. Please attempt to save to a different location.
2823	The Microsoft Office Access data access page name ' ' is misspelled or refers to a Page that doesn't exist. If the invalid Page name is in a macro, an Action Failed dialog box will display the macro name and the macro's arguments after you click OK. Open the Macro window, and enter the correct Page name.
2824	You do not have adequate file permissions.
2825	The file does not exist, or you do not have read access to the file.
2827	File read error.
2828	File write error. The disk may be full.
2832	Check file permissions and delete them from their location in your computer's file system.
2833	An unexpected error has occurred.
2835	An attempt to create this file has failed. Please select another location and retry the operation.
2837	There was not enough memory. Please close other applications and try the operation again.
2838	Microsoft Office Access is unable to preview the selected theme.
2839	An attempt to create a temporary file has failed. Please confirm that you have adequate disk space on your system drive and try the operation again.
2840	Unable to read the list of supporting files from the data access page.
2842	Microsoft Office Access encountered an error after saving (or sending) your data access page.
2845	Microsoft Office Access is unable to open the data access page from the mail envelope.
2846	The save destination is full. Please clear space at the destination or save to another location.
2847	Unable to create a folder for the supporting files. You may not have adequate permissions at the save destination.

- 3005 '|' is not a valid database name.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3006 Database '|' is exclusively locked.
- 3007 Cannot open library database '|'.
- 3008 The table '|' is already opened exclusively by another user, or it is already open through the user interface and cannot be manipulated programmatically.
- 3009 You tried to lock table '|' while opening it, but the table cannot be locked because it is currently in use. Wait a moment, and then try the operation again.
- 3010 Table '|' already exists.
- 3011 The Microsoft Office Access database engine could not find the object '|'. Make sure the object exists and that you spell its name and the path name correctly.
- 3012 Object '|' already exists.
- 3013 Could not rename installable ISAM file.
- 3014 Cannot open any more tables.
- 3015 Index not found.
- 3016 Field will not fit in record.
- 3017 The size of a field is too long.
- 3018 Could not find field.
- 3019 Operation invalid without a current index.
- 3020 Update or CancelUpdate without AddNew or Edit.
- 3021 No current record.
- 3022 The changes you requested to the table were not successful because they would create duplicate values in the index, primary key, or relationship. Change the data in the field or fields that contain duplicate data, remove the index, or redefine the index to permit duplicate entries and try again.
- 3023 AddNew or Edit already used.
- 3024 Could not find file '|'.
- 3025 Cannot open any more files.
- 3026 Not enough space on disk.
- 3027 Cannot update. Database or object is read-only.
- 3028 Cannot start your application. The workgroup information file is missing or opened exclusively by another user.
- 3029 Not a valid account name or password.
- 3030 '|' is not a valid account name.
- 3031 Not a valid password.
- 3032 Cannot perform this operation.
- 3033 You do not have the necessary permissions to use the '|' object. Have your system administrator or the person who created this object establish the appropriate permissions for you.
- 3034 You tried to commit or rollback a transaction without first beginning a transaction.
- 3035 System resource exceeded.
- 3036 Database has reached maximum size.
- 3037 Cannot open any more tables or queries.
- 3038 System resource exceeded.
- 3039 Could not create index; too many indexes already defined.
- 3040 Disk I/O error during read.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3041 Cannot open a database created with a previous version of your application.
- 3042 Out of MS-DOS file handles.
- 3043 Your network access was interrupted. To continue, close the database, and then open it again.
- 3044 '|' is not a valid path. Make sure that the path name is spelled correctly and that you are connected to the server on which the file resides.
- 3045 Could not use '|'; file already in use.
- 3046 Could not save; currently locked by another user.
- 3047 Record is too large.
- 3048 Cannot open any more databases.
- 3049 Cannot open database '|'. It may not be a database that your application recognizes, or the file may be corrupt.
- 3050 Could not lock file.
- 3051 The Microsoft Office Access database engine cannot open or write to the file '|'. It is already opened exclusively by another user, or you need permission to view and write its data.
- 3052 File sharing lock count exceeded. Increase MaxLocksPerFile registry entry.
- 3053 Too many client tasks.
- 3054 Too many Memo, OLE, or Hyperlink Object fields.
- 3055 Not a valid file name.
- 3056 Could not repair this database.
- 3057 Operation not supported on linked tables.
- 3058 Index or primary key cannot contain a Null value.
- 3059 Operation canceled by user.
- 3060 Wrong data type for parameter '|'.
- 3061 Too few parameters. Expected |.
- 3062 Duplicate output alias '|'.
- 3063 Duplicate output destination '|'.
- 3064 Cannot open action query '|'.
- 3065 Cannot execute a select query.
- 3066 Query must have at least one destination field.
- 3067 Query input must contain at least one table or query.
- 3068 Not a valid alias name.
- 3069 The action query '|' cannot be used as a row source.
- 3070 The Microsoft Office Access database engine does not recognize '|' as a valid field name or expression.
- 3071 This expression is typed incorrectly, or it is too complex to be evaluated. For example, a numeric expression may contain too many complicated elements. Try simplifying the expression by assigning parts of the expression to variables.
- 3072 |
- 3073 Operation must use an updateable query.
- 3074 Cannot repeat table name '|' in FROM clause.
- 3075 |1 in query expression '|2'.
- 3076 | in criteria expression.
- 3077 | in expression.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3078 The Microsoft Office Access database engine cannot find the input table or query '|'. Make sure it exists and that its name is spelled correctly.
- 3079 The specified field '|' could refer to more than one table listed in the FROM clause of your SQL statement.
- 3080 Joined table '|' not listed in FROM clause.
- 3081 Cannot join more than one table with the same name (|).
- 3082 JOIN operation '|' refers to a field that is not in one of the joined tables.
- 3083 Cannot use internal report query.
- 3084 Cannot insert data with action query.
- 3085 Undefined function '|' in expression.
- 3086 Could not delete from specified tables.
- 3087 Too many expressions in GROUP BY clause.
- 3088 Too many expressions in ORDER BY clause.
- 3089 Too many expressions in DISTINCT output.

- 3091 HAVING clause (|) without grouping or aggregation.
- 3092 Cannot use HAVING clause in TRANSFORM statement.
- 3093 ORDER BY clause (|) conflicts with DISTINCT.
- 3094 ORDER BY clause (|) conflicts with GROUP BY clause.
- 3095 Cannot have aggregate function in expression (|).
- 3096 Cannot have aggregate function in WHERE clause (|).
- 3097 Cannot have aggregate function in ORDER BY clause (|).
- 3098 Cannot have aggregate function in GROUP BY clause (|).
- 3099 Cannot have aggregate function in JOIN operation (|).
- 3100 Cannot set field '|' in join key to Null.
- 3101 The Microsoft Office Access database engine cannot find a record in the table '|2' with key matching field(s) '|1'.
- 3102 Circular reference caused by '|'.
- 3103 Circular reference caused by alias '|' in query definition's SELECT list.
- 3104 Cannot specify fixed column heading '|' in a crosstab query more than once.
- 3105 Missing destination field name in SELECT INTO statement (|).
- 3106 Missing destination field name in UPDATE statement (|).
- 3107 Record(s) cannot be added; no insert permission on '|'.
- 3108 Record(s) cannot be edited; no update permission on '|'.
- 3109 Record(s) cannot be deleted; no delete permission on '|'.
- 3110 Could not read definitions; no read definitions permission for table or query '|'.
- 3111 Could not create; no modify design permission for table or query '|'.
- 3112 Record(s) cannot be read; no read permission on '|'.
- 3113 Cannot update '|'; field not updateable.
- 3114 Cannot include Memo, OLE, or Hyperlink Object when you select unique values (|).
- 3115 Cannot have Memo, OLE, or Hyperlink Object fields in aggregate argument (|).
- 3116 Cannot have Memo, OLE, or Hyperlink Object fields in criteria (|) for aggregate function.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3117 Cannot sort on Memo, OLE, or Hyperlink Object (|).
- 3118 Cannot join on Memo, OLE, or Hyperlink Object (|).
- 3119 Cannot group on Memo, OLE, or Hyperlink Object (|).
- 3120 Cannot group on fields selected with '\*' (|).
- 3121 Cannot group on fields selected with '\*'.
- 3122 You tried to execute a query that does not include the specified expression '|' as part of an aggregate function.
- 3123 Cannot use '\*' in crosstab query.
- 3124 Cannot input from internal report query (|).
- 3125 '|' is not a valid name. Make sure that it does not include invalid characters or punctuation and that it is not too long.
- 3126 Invalid bracketing of name '|'.
- 3127 The INSERT INTO statement contains the following unknown field name: '|'. Make sure you have typed the name correctly, and try the operation again.
- 3128 Specify the table containing the records you want to delete.
- 3129 Invalid SQL statement; expected 'DELETE', 'INSERT', 'PROCEDURE', 'SELECT', or 'UPDATE'.
- 3130 Syntax error in DELETE statement.
- 3131 Syntax error in FROM clause.
- 3132 Syntax error in GROUP BY clause.
- 3133 Syntax error in HAVING clause.
- 3134 Syntax error in INSERT INTO statement.
- 3135 Syntax error in JOIN operation.
- 3136 The LEVEL clause includes a reserved word or argument that is misspelled or missing, or the punctuation is incorrect.
- 3137 Missing semicolon (;) at end of SQL statement.
- 3138 Syntax error in ORDER BY clause.
- 3139 Syntax error in PARAMETER clause.
- 3140 Syntax error in PROCEDURE clause.
- 3141 The SELECT statement includes a reserved word or an argument name that is misspelled or missing, or the punctuation is incorrect.
- 3142 Characters found after end of SQL statement.
- 3143 Syntax error in TRANSFORM statement.
- 3144 Syntax error in UPDATE statement.
- 3145 Syntax error in WHERE clause.
- 3146 ODBC--call failed.
- 3151 ODBC--connection to '|' failed.
- 3154 ODBC--could not find DLL '|'.
- 3155 ODBC--insert on a linked table '|' failed.
- 3156 ODBC--delete on a linked table '|' failed.
- 3157 ODBC--update on a linked table '|' failed.
- 3158 Could not save record; currently locked by another user.
- 3159 Not a valid bookmark.
- 3160 Table is not open.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3161 Could not decrypt file.
- 3162 You tried to assign the Null value to a variable that is not a Variant data type.
- 3163 The field is too small to accept the amount of data you attempted to add. Try inserting or pasting less data.
- 3164 Field cannot be updated.
- 3165 Could not open .inf file.
- 3166 Cannot locate the requested Xbase memo file.
- 3167 Record is deleted.
- 3168 Invalid .inf file.
- 3169 The Microsoft Office Access database engine could not execute the SQL statement because it contains a field that has an invalid data type.
- 3170 Could not find installable ISAM.
- 3171 Could not find network path or user name.
- 3172 Could not open Paradox.net.
- 3173 Could not open table 'MSysAccounts' in the workgroup information file.
- 3174 Could not open table 'MSysGroups' in the workgroup information file.
- 3175 Date is out of range or is in an invalid format.
- 3176 Could not open file '|'.|
- 3177 Not a valid table name.
- 3179 Encountered unexpected end of file.
- 3180 Could not write to file '|'.|
- 3181 Invalid range.
- 3182 Invalid file format.
- 3183 The query cannot be completed. Either the size of the query result is larger than the maximum size of a database (2 GB), or there is not enough temporary storage space on the disk to store the query result.
- 3184 Could not execute query; could not find linked table.
- 3185 SELECT INTO on a remote database tried to produce too many fields.
- 3186 Could not save; currently locked by user '|2' on machine '|1'.
- 3187 Could not read; currently locked by user '|2' on machine '|1'.
- 3188 Could not update; currently locked by another session on this machine.
- 3189 Table '|1' is exclusively locked by user '|3' on machine '|2'.
- 3190 Too many fields defined.
- 3191 Cannot define field more than once.
- 3192 Could not find output table '|'.|
- 3193 (unknown)
- 3194 (unknown)
- 3195 (expression)
- 3196 The database '|' is already in use by another person or process. When the database is available, try the operation again.
- 3197 The Microsoft Office Access database engine stopped the process because you and another user are attempting to change the same data at the same time.
- 3198 Could not start session. Too many sessions already active.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

3199	Could not find reference.
3200	The record cannot be deleted or changed because table ' ' includes related records.
3201	You cannot add or change a record because a related record is required in table ' '.
3202	Could not save; currently locked by another user.
3203	Subqueries cannot be used in the expression ( ).
3204	Database already exists.
3205	Too many crosstab column headers ( ).
3206	Cannot create a relationship between a field and itself.
3207	Operation not supported on a Paradox table with no primary key.
3208	Invalid Deleted setting in the Xbase key of the Windows Registry.
3209	*****
3210	The connection string is too long. The connection string cannot exceed 255 characters.
3211	The database engine could not lock table ' ' because it is already in use by another person or process.
3212	Could not lock table ' 1'; currently in use by user ' 3' on machine ' 2'.
3213	Invalid Date setting in the Xbase key of the Windows Registry.
3214	Invalid Mark setting in the Xbase key of the Windows Registry.
3215	Too many Btrieve tasks.
3216	Parameter ' ' specified where a table name is required.
3217	Parameter ' ' specified where a database name is required.
3218	Could not update; currently locked.
3219	Invalid operation.
3220	Incorrect collating sequence.
3221	Invalid settings in the Btrieve key of the Windows Registry.
3222	Query cannot contain a Database parameter.
3223	' ' is invalid because it is too long, or contains invalid characters.
3224	Cannot read Btrieve data dictionary.
3225	Encountered a record locking deadlock while performing a Btrieve operation.
3226	Errors encountered while using the Btrieve DLL.
3227	Invalid Century setting in the Xbase key of the Windows Registry.
3228	Selected collating sequence not supported by the operating system.
3229	Btrieve--cannot change field.
3230	Out-of-date Paradox lock file.
3231	ODBC--field would be too long; data truncated.
3232	ODBC--could not create table.
3234	ODBC--remote query timeout expired.
3235	ODBC--data type not supported on server.
3238	ODBC--data out of range.
3239	Too many active users.
3240	Btrieve--missing Btrieve engine.
3241	Btrieve--out of resources.
3242	Invalid reference in SELECT statement.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3243 None of the import field names match fields in the appended table.
- 3244 Cannot import password-protected spreadsheet.
- 3245 Could not parse field names from the first row of the import table.
- 3246 Operation not supported in transactions.
- 3247 ODBC--linked table definition has changed.
- 3248 Invalid NetworkAccess setting in the Windows Registry.
- 3249 Invalid PageTimeout setting in the Windows Registry.
- 3250 Could not build key.
- 3251 Operation is not supported for this type of object.
- 3252 Cannot open a form whose underlying query contains a user-defined function that attempts to set or get the form's RecordsetClone property.
- 3254 ODBC--Cannot lock all records.
- 3256 Index file not found.
- 3257 Syntax error in WITH OWNERACCESS OPTION declaration.
- 3258 The SQL statement could not be executed because it contains ambiguous outer joins. To force one of the joins to be performed first, create a separate query that performs the first join and then include that query in your SQL statement.
- 3259 Invalid field data type.
- 3260 Could not update; currently locked by user '|2' on machine '|1'.
- 3261 Table '|' is exclusively locked by user '|2' on machine '|1'.
- 3262 Could not lock table
- 3263 Invalid Database object.
- 3264 No field defined--cannot append TableDef or Index.
- 3265 Item not found in this collection.
- 3266 Cannot append a Field that is already a part of a Fields collection.
- 3267 Property can be set only when the Field is part of a Recordset object's Fields collection.
- 3268 Cannot set this property once the object is part of a collection.
- 3269 Cannot append an Index that is already a part of an Indexes collection.
- 3270 Property not found.
- 3271 Invalid property value.
- 3272 Object is not a collection.
- 3273 Method not applicable for this object.
- 3274 External table is not in the expected format.
- 3275 Unexpected error from external database driver ({}).
- 3276 Invalid database object reference.
- 3277 Cannot have more than 10 fields in an index.
- 3278 The Microsoft Office Access database engine has not been initialized.
- 3279 The Microsoft Office Access database engine has already been initialized.
- 3280 Cannot delete a field that is part of an index or is needed by the system.
- 3281 Cannot delete this index or table. It is either the current index or is used in a relationship.
- 3282 Operation not supported on a table that contains data.
- 3283 Primary key already exists.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

3284	Index already exists.
3285	Invalid index definition.
3286	Format of memo file does not match specified external database format.
3287	Cannot create index on the given field.
3288	Paradox index is not primary.
3289	Syntax error in CONSTRAINT clause.
3290	Syntax error in CREATE TABLE statement.
3291	Syntax error in CREATE INDEX statement.
3292	Syntax error in field definition.
3293	Syntax error in ALTER TABLE statement.
3294	Syntax error in DROP INDEX statement.
3295	Syntax error in DROP TABLE or DROP INDEX.
3296	JOIN expression not supported.
3297	Could not import table or query. No records found, or all records contain errors.
3298	There are several tables with that name. Please specify owner in the format 'owner.table'.
3299	ODBC Specification Conformance Error (()). Report this error to the developer of your application.
3300	Cannot create a relationship.
3301	Cannot perform this operation; features in this version are not available in databases with older formats.
3302	Cannot change a rule while the rules for this table are in use.
3303	Cannot delete this field. It is part of one or more relationships.
3304	You must enter a personal identifier (PID) consisting of at least 4 and no more than 20 characters and digits.
3305	Invalid connection string in pass-through query.
3306	You have written a subquery that can return more than one field without using the EXISTS reserved word in the main query's FROM clause. Revise the SELECT statement of the subquery to request only one field.
3307	The number of columns in the two selected tables or queries of a union query do not match.
3308	Invalid TOP argument in select query.
3309	Property value is too large.
3310	This property is not supported for external data sources or for databases created with a previous version of Microsoft Jet.
3311	Property specified already exists.
3312	Validation rules and default values cannot be placed on system or linked tables.
3313	Cannot place this validation expression on this field.
3314	You must enter a value in the ' ' field.
3315	Field ' ' cannot be a zero-length string.
3316	
3317	One or more values are prohibited by the validation rule ' 2' set for ' 1'. Enter a value that the expression for this field can accept.
3318	Values specified in a TOP clause are not allowed in delete queries or reports.
3319	Syntax error in union query.
3320	in table-level validation expression.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3321 No database specified in connection string or IN clause.
- 3322 Crosstab query contains one or more invalid fixed column headings.
- 3323 The query cannot be used as a row source.
- 3324 The query is a DDL query and cannot be used as a row source.
- 3325 Pass-through query with ReturnsRecords property set to True did not return any records.
- 3326 This Recordset is not updateable.
- 3327 Field '|' is based on an expression and cannot be edited.
- 3328 Table '|2' is read-only.
- 3329 Record in table '|' was deleted by another user.
- 3330 Record in table '|' is locked by another user.
- 3331 To make changes to this field, first save the record.
- 3332 Cannot enter value into blank field on 'one' side of outer join.
- 3333 Records in table '|' would have no record on the 'one' side.
- 3334 Can be present only in version 1.0 format.
- 3335 DeleteOnly called with non-zero cbData.
- 3336 Btrieve: Invalid IndexDDF option in initialization setting.
- 3337 Invalid DataCodePage option in initialization setting.
- 3338 Btrieve: Xtrieve options are not correct in initialization setting.
- 3339 Btrieve: Invalid IndexDeleteReNumber option in initialization setting.
- 3340 Query '|' is corrupt.
- 3341 The current field must match the join key '|' in the table that serves as the 'one' side of one-to-many relationship. Enter a record in the 'one' side table with the desired key value, and then make the entry with the desired join key in the 'many-only' table.
- 3342 Invalid Memo, OLE, or Hyperlink Object in subquery '|'.
- 3343 Unrecognized database format '|'.
- 3344 The database engine does not recognize either the field '|1' in a validation expression, or the default value in the table '|2'.
- 3345 Unknown or invalid field reference '|'.
- 3346 Number of query values and destination fields are not the same.
- 3347 Cannot add record(s); primary key for table '|' not in recordset.
- 3348 Cannot add record(s); join key of table '|' not in recordset.
- 3349 You cannot record your changes because a value you entered violates the settings defined for this table or list (for example, a value is less than the minimum or greater than the maximum). Correct the error and try again.
- 3350 Object is invalid for operation.
- 3351 The ORDER BY expression (|) includes fields that are not selected by the query. Only those fields requested in the first query can be included in an ORDER BY expression.
- 3352 No destination field name in INSERT INTO statement (|).
- 3353 Btrieve: Cannot find file Field.ddf.
- 3354 At most one record can be returned by this subquery.
- 3355 Syntax error in default value.
- 3356 You attempted to open a database that is already opened exclusively by user '|2' on machine '|1'. Try again when the database is available.
- 3357 This query is not a properly formed data-definition query.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3358 Cannot open the Microsoft Office Access database engine workgroup information file.
- 3359 Pass-through query must contain at least one character.
- 3360 Query is too complex.
- 3361 Unions not allowed in a subquery.
- 3362 Single-row update/delete affected more than one row of a linked table. Unique index contains duplicate values.
- 3363 Record(s) cannot be added; no corresponding record on the 'one' side.
- 3364 Cannot use Memo, OLE, or Hyperlink Object field '|' in the SELECT clause of a union query.
- 3365 Property value not valid for REMOTE objects.
- 3366 Cannot append a relation with no fields defined.
- 3367 Cannot append. An object with that name already exists in the collection.
- 3368 Relationship must be on the same number of fields with the same data types.
- 3369 \*\*\*\*\*
- 3370 Cannot modify the design of table '|'. It is in a read-only database.
- 3371 Cannot find table or constraint.
- 3372 No such index '|2' on table '|1'.
- 3373 Cannot create relationship. Referenced table '|' does not have a primary key.
- 3374 The specified fields are not uniquely indexed in table '|'.  
3375 Table '|1' already has an index named '|2'.
- 3376 Table '|' does not exist.
- 3377 No such relationship '|2' on table '|1'.
- 3378 There is already a relationship named '|' in the current database.
- 3379 Cannot create relationships to enforce referential integrity. Existing data in table '|2' violates referential integrity rules in table '|1'.
- 3380 Field '|2' already exists in table '|1'.
- 3381 There is no field named '|2' in table '|1'.
- 3382 Size of field '|' is too long.
- 3383 Cannot delete field '|'. It is part of one or more relationships.
- 3384 Cannot delete a built-in property.
- 3385 User-defined properties do not support a Null value.
- 3386 Property '|' must be set before using this method.
- 3387 Cannot find TEMP directory.
- 3388 Unknown function '|2' in validation expression or default value on '|1'.
- 3389 Query support unavailable.
- 3390 Account name already exists.
- 3391 An error has occurred. Properties were not saved.
- 3392 \*\*\*\*\*
- 3393 Cannot perform join, group, sort, or indexed restriction. A value being searched or sorted on is too long.
- 3394 Cannot save property; property is a schema property.
- 3395 \*\*\*\*\*
- 3396 Cannot perform cascading operation. Since related records exist in table '|', referential integrity rules would be violated.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3397 Cannot perform cascading operation. There must be a related record in table '|1'.
- 3398 Cannot perform cascading operation. It would result in a null key in table '|1'.
- 3399 Cannot perform cascading operation. It would result in a duplicate key in table '|1'.
- 3400 Cannot perform cascading operation. It would result in two updates to field '|2' in table '|1'.
- 3401 Cannot perform cascading operation. It would cause field '|' to become Null, which is not allowed.
- 3402 Cannot perform cascading operation. It would cause field '|' to become a zero-length string, which is not allowed.
- 3403 Cannot perform cascading operation: '|1'.
- 3404 Cannot perform cascading operation. The value entered is prohibited by the validation rule '|2' set for '|1'.
- 3405 Error '|' in validation rule.
- 3406 The expression you are trying to use for the DefaultValue property is invalid because '|1'. Use a valid expression to set this property.
- 3407 The server's MSysConf table exists, but is in an incorrect format. Contact your system administrator.
- 3408 Too many FastFind Sessions were invoked.
- 3409 Invalid field definition '|' in definition of index or relationship.
- 3411 Invalid entry. Cannot perform cascading operation in table '|1' because the value entered is too large for field '|2'.
- 3412 Cannot perform cascading update on the table because it is currently in use by another user.
- 3413 Cannot perform cascading operation on table '|1' because it is currently in use by user '|3' on machine '|2'.
- 3414 Cannot perform cascading operation on table '|1' because it is currently in use.
- 3415 Zero-length string is valid only in a Text or Memo field.
- 3416 |
- 3417 An action query cannot be used as a row source.
- 3418 Cannot open '|1'. Another user has the table open using a different network control file or locking style.
- 3419 Cannot open this Paradox 4.x or 5.x table because ParadoxNetStyle is set to 3.x in the Windows Registry.
- 3420 Object invalid or no longer set.
- 3421 Data type conversion error.
- 3422 Cannot modify table structure. Another user has the table open.
- 3423 You cannot use ODBC to import from, export to, or link an external Microsoft Office Access or ISAM database table to your database.
- 3424 Cannot create database because the locale is invalid.
- 3425 This method or property is not currently available on this Recordset.
- 3426 This action was cancelled by an associated object.
- 3427 Error in DAO automation.
- 3428 A problem occurred in your database. Correct the problem by repairing and compacting the database.
- 3429 Incompatible version of an installable ISAM.
- 3430 While loading the Microsoft Excel installable ISAM, OLE was unable to initialize.
- 3431 This is not a Microsoft Excel 5.0 file.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3432 Error opening a Microsoft Excel 5.0 file.
- 3433 Invalid setting in Excel key of the Engines section of the Windows Registry.
- 3434 Cannot expand named range.
- 3435 Cannot delete spreadsheet cells.
- 3436 Failure creating file.
- 3437 Spreadsheet is full.
- 3438 The data being exported does not match the format described in the Schema.ini file.
- 3439 You attempted to link or import a Microsoft Word mail merge file. Although you can export such files, you cannot link or import them.
- 3440 An attempt was made to import or link an empty text file. To import or link a text file, the file must contain data.
- 3441 Text file specification field separator matches decimal separator or text delimiter.
- 3442 In the text file specification '|1', the |2 option is invalid.
- 3443 The fixed width specification '|1' contains no column widths.
- 3444 In the fixed width specification '|1', column '|2' does not specify a width.
- 3445 Incorrect version of the DLL file '|1' was found.
- 3446 The VBA file (VBAJET.dll for 16-bit versions, or VBAJET32.dll for 32-bit versions) is missing. Try reinstalling the application that returned the error.
- 3447 The VBA file (VBAJET.dll for 16-bit versions, or VBAJET32.dll for 32-bit versions) failed to initialize when called. Try reinstalling the application that returned the error.
- 3448 A call to an OLE system function was not successful. Try reinstalling the application that returned the error.
- 3449 No country/region code found in connection string for a linked table.
- 3450 Syntax error in query. Incomplete query clause.
- 3451 Illegal reference in query.
- 3452 You cannot make changes to the design of the database at this replica.
- 3453 You cannot establish or maintain an enforced relationship between a replicated table and a local table.
- 3455 Cannot make the database replicable.
- 3456 Cannot make the |2 object in |1 container replicable.
- 3457 You cannot set the KeepLocal property for an object that is already replicated.
- 3458 The KeepLocal property cannot be set on a database; it can be set only on the objects in a database.
- 3459 After a database has been replicated, you cannot remove the replication features from the database.
- 3460 The operation you attempted conflicts with an existing operation involving this member of the replica set.
- 3461 The replication property you are attempting to set or delete is read-only and cannot be changed.
- 3462 Failure to load a DLL.
- 3463 Cannot find the .dll '|2'.
- 3464 Data type mismatch in criteria expression.
- 3465 The disk drive you are attempting to access is unreadable.
- 3468 Access was denied while accessing dropbox folder '|2'.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3469 The disk for dropbox folder '|2' is full.
- 3470 Disk failure accessing dropbox folder '|2'.
- 3471 Failure to write to the Synchronizer log file.
- 3472 Disk full for path '|1'.
- 3473 Disk failure while accessing log file '|1'.
- 3474 Cannot open the log file '|1' for writing.
- 3475 Sharing violation while attempting to open log file '|1' in Deny Write mode.
- 3476 Invalid dropbox path '|2'.
- 3477 Dropbox address '|2' is syntactically invalid.
- 3478 The replica is not a partial replica.
- 3479 Cannot designate a partial replica as the Design Master for the replica set.
- 3480 The relationship '|' in the partial filter expression is invalid.
- 3481 The table name '|' in the partial filter expression is invalid.
- 3482 The filter expression for the partial replica is invalid.
- 3483 The password supplied for the dropbox folder '|2' is invalid.
- 3484 The password used by the Synchronizer to write to a destination dropbox folder is invalid.
- 3485 The object cannot be replicated because the database is not replicated.
- 3486 You cannot add a second Replication ID AutoNumber field to a table.
- 3487 The database you are attempting to replicate cannot be converted.
- 3488 The value specified is not a ReplicaID for any member in the replica set.
- 3489 The object specified cannot be replicated because it is missing a necessary resource.
- 3490 Cannot create a new replica because the '|2' object in '|1' container could not be replicated.
- 3491 The database must be opened in exclusive mode before it can be replicated.
- 3492 The synchronization failed because a design change could not be applied to one of the replicas.
- 3493 Cannot set the specified Registry parameter for the Synchronizer.
- 3494 Unable to retrieve the specified Registry parameter for the Synchronizer.
- 3495 There are no scheduled synchronization's between the two Synchronizers.
- 3496 Replication Manager cannot find the ExchangeID in the MSysExchangeLog table.
- 3497 Unable to set a schedule for the Synchronizer.
- 3499 Cannot retrieve the full path information for a member of the replica set.
- 3500 You cannot specify two different Synchronizers to manage the same replica.
- 3502 The Design Master or replica is not being managed by a Synchronizer.
- 3503 The Synchronizer's Registry has no value set for the key you queried.
- 3504 The Synchronizer ID does not match an existing ID in the MSysTranspAddress table.
- 3505 You attempted to delete or get information about a partial filter that does not exist in MSysFilters.
- 3506 The Synchronizer is unable to open the Synchronizer log.
- 3507 Failure writing to the Synchronizer log.
- 3508 There is no active transport for the Synchronizer.
- 3509 Could not find a valid transport for this Synchronizer.
- 3510 The member of the replica set you are attempting to synchronize is currently being used in another synchronization.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

3512	Failed to read the dropbox folder.
3513	Failed to write to the dropbox folder.
3514	Synchronizer could not find any scheduled or on-demand synchronization's to process.
3515	The Microsoft Office Access database engine could not read the system clock on your computer.
3516	Destination synchronizer is not configured to support indirect synchronronization, and the destination replica is unavailable for direct synchronization.
3517	Synchronizer could not find any messages to process.
3518	Could not find Synchronizer in the MSysTranspAddress table.
3519	Failed to send a message.
3520	The replica name or ID does not match a currently managed member of the replica set.
3521	Two members of the replica set cannot be synchronized because there is no common point to start the synchronization.
3522	Synchronizer cannot find the record of a specific synchronization in the MSysExchangeLog table.
3523	Synchronizer cannot find a specific version number in the MSysSchChange table.
3524	The history of design changes in the replica does not match the history in the Design Master.
3525	Synchronizer could not access the message database.
3526	The name selected for the system object is already in use.
3527	The Synchronizer or Replication Manager could not find the system object.
3528	There is no new data in shared memory for the Synchronizer or Replication Manager to read.
3529	The Synchronizer or Replication Manager found unread data in the shared memory. The existing data will be overwritten.
3530	The Synchronizer is already serving a client.
3531	The wait period for an event has timed out.
3532	Synchronizer could not be initialized.
3533	The system object used by a process still exists after the process has stopped.
3534	Synchronizer looked for a system event but did not find one to report to the client.
3535	Client has asked the Synchronizer to terminate operation.
3536	Synchronizer received an invalid message for a member of the replica set that it manages.
3537	The Synchronizer's client is no longer present and cannot be notified.
3538	Cannot initialize Synchronizer because there are too many applications running.
3539	A system error has occurred or your swap file has reached its limit.
3540	Your swap file has reached its limit or is corrupted.
3541	Synchronizer could not be shut down properly and is still active.
3542	Process stopped when attempting to terminate Synchronizer client.
3543	Synchronizer has not been set up.
3544	Synchronizer is already running.
3545	The two replicas you are attempting to synchronize are from different replica sets.
3546	The type of synchronization you are attempting is not valid.
3547	Synchronizer could not find a replica from the correct set to complete the synchronization.
3548	GUIDs do not match or the requested GUID could not be found.
3549	The file name you provided is too long.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3550 There is no index on the GUID column.
- 3551 Unable to delete the specified Registry parameter for the Synchronizer.
- 3552 The size of the Registry parameter exceeds the maximum allowed.
- 3553 The GUID could not be created.
- 3555 All valid nicknames for replicas are already in use.
- 3556 Invalid path for destination dropbox folder.
- 3557 Invalid address for destination dropbox folder.
- 3558 Disk I/O error at destination dropbox folder.
- 3559 Failure to write because destination disk is full.
- 3560 The two members of the replica set you are attempting to synchronize have the same ReplicaID.
- 3561 The two members of the replica set you are attempting to synchronize are both Design Masters.
- 3562 Access denied at destination dropbox folder.
- 3563 Fatal error accessing a local dropbox folder.
- 3564 Synchronizer cannot find the source file for messages.
- 3565 There is a sharing violation in the source dropbox folder because the message database is open in another application.
- 3566 Network I/O error.
- 3567 Message in dropbox folder belongs to the wrong Synchronizer.
- 3568 Synchronizer could not delete a file.
- 3569 This member of the replica set has been logically removed from the set and is no longer available.
- 3570 The filters defining a partial replica have been changed. The partial replica must be repopulated.
- 3571 The attempt to set a column in a partial replica violated a rule governing partial replicas.
- 3572 A disk I/O error occurred while reading or writing to the TEMP directory.
- 3573 The directory you queried for a list of replicas is not a managed directory.
- 3574 The ReplicaID for this member of the replica set was reassigned during a move or copy procedure.
- 3575 The disk drive you are attempting to write to is full.
- 3576 The database you are attempting to open is already in use by another application.
- 3577 Cannot update replication system column.
- 3578 Failure to replicate database; cannot determine whether the database is open in exclusive mode.
- 3579 Could not create replication system tables needed to make the database replicable.
- 3580 Could not add rows needed to make the database replicable.
- 3581 Cannot open replication system table '|1' because the table is already in use.
- 3582 Cannot make a new replica because the |2 object in |1 container could not be made replicable.
- 3583 Cannot make the |2 object in |1 container replicable.
- 3584 Insufficient memory to complete operation.
- 3585 Cannot replicate the table; the number of columns exceeds the maximum allowed.
- 3586 Syntax error in partial filter expression on table |1.
- 3587 Invalid expression in the ReplicaFilter property.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3588 Error when evaluating the partial filter expression.
- 3589 The partial filter expression contains an unknown function.
- 3590 Violates the rules for partial replicas.
- 3591 Log file path '|1' is invalid.
- 3592 You cannot replicate a password-protected database or set password protection on a replicated database.
- 3593 You cannot change the data master attribute for the replica set.
- 3594 You cannot change the data master attribute for the replica set. It allows data changes only at the Design Master.
- 3595 The system tables in your replica are no longer reliable and the replica should not be used.
- 3600 Aggregation expressions cannot use GUIDs.
- 3605 Synchronizing with a non-replicated database is not allowed. The '|' database is not a Design Master or replica.
- 3607 The replication property you are attempting to delete is read-only and cannot be removed.
- 3608 Record length is too long for an indexed Paradox table.
- 3609 No unique index found for the referenced field of the primary table.
- 3610 Same table '|' referenced as both the source and destination in make-table query.
- 3611 Cannot execute data definition statements on linked data sources.
- 3612 Multi-level GROUP BY clause is not allowed in a subquery.
- 3613 Cannot create a relationship on linked ODBC tables.
- 3614 GUID not allowed in Find method criteria expression.
- 3615 Type mismatch in expression.
- 3616 Updating data in a linked table is not supported by this ISAM.
- 3617 Deleting data in a linked table is not supported by this ISAM.
- 3618 Exceptions table could not be created on import/export.
- 3619 Records could not be added to exceptions table.
- 3620 The connection for viewing your linked Microsoft Excel worksheet was lost.
- 3621 Cannot change password on a shared open database.
- 3622 You must use the dbSeeChanges option with OpenRecordset when accessing a SQL Server table that has an IDENTITY column.
- 3623 Cannot access the FoxPro 3.0 bound DBF file '|'.
- 3624 Could not read the record; currently locked by another user.
- 3625 The text file specification '|' does not exist. You cannot import, export, or link using the specification.
- 3626 The operation failed. There are too many indexes on table '|'. Delete some of the indexes on the table and try the operation again.
- 3627 Cannot find the executable file for the Synchronizer (mstran40.exe).
- 3628 Partner replica is not managed by a Synchronizer.
- 3629 Synchronizer '|1' is also using the same File System dropbox '|2'.
- 3630 Synchronizer '|1' is also using the same File System dropbox '|2'.
- 3631 Invalid Table Name In Filter
- 3632 Internet Transport not enabled on the remote Synchronizer.
- 3633 Cannot load DLL: '|'

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3634 Cannot create a replica using a partial replica.
- 3635 Cannot create partial replica of a system database.
- 3636 Cannot populate the replica or change the replica's filter because the replica has conflicts or data errors.
- 3637 Cannot use the crosstab of a non-fixed column as a subquery.
- 3638 A Source Controlled database cannot be made replicable.
- 3639 Cannot create a replica of a System database.
- 3640 The fetch buffer was too small for the amount of data you requested.
- 3641 There are fewer records remaining in the recordset than you requested.
- 3642 A cancel was performed on the operation.
- 3643 One of the records in the recordset was deleted by another process.
- 3645 One of the binding parameters is incorrect.
- 3646 The specified row length is shorter than the sum of the column lengths.
- 3647 A column requested is not being returned to the recordset.
- 3648 Cannot synchronize a partial replica with another partial replica.
- 3649 The language-specific code page was not specified or could not be found.
- 3650 Either the Internet is very slow or there is some problem in the replication manager setup on the internet server machine.
- 3651 Invalid internet address.
- 3652 Internet login failure.
- 3653 Internet not set up.
- 3654 Internal internet failure.
- 3655 The wininet.dll cannot be loaded or initialized.
- 3656 Error in evaluating a partial expression
- 3657 Error in evaluating the boolean filter expression for table '|1|'.
- 3658 Binary column '|' cannot be used in a boolean filter.
- 3659 Relationship '|1|' is unenforced. Relationship in a partial filter expression must be enforced.
- 3660 Requested exchange failed because '|1|'.
- 3661 Requested exchange failed because '|1|'
- 3663 This operation requires a different cursor library.
- 3664 An asynchronous OpenConnection call is not yet complete; you cannot yet reference the returned connection object until it is complete.
- 3665 You cannot modify the replication system object '|'.
- 3666 You cannot modify the replication system object '|'.
- 3667 A different operation is preventing this operation from being executed.
- 3668 Cannot perform this operation because there is no active connection.
- 3669 Execution cancelled.
- 3670 Cursor is not valid.
- 3671 Cannot find table to update.
- 3672 Failed to load RDOCURS.DLL.
- 3673 This table contains cells that are outside the range of cells defined in this spreadsheet.
- 3674 Internet dll (wininet.dll) could not be found or loaded.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3675 Failure to read from an internet handle. Try the operation again.
- 3676 Failure to write to an internet handle. Try the operation again.
- 3677 Failure to execute the HTTP request to start internet synchronizer on the internet server. Use Replication Manager to configure internet synchronizer on the internet server.
- 3678 Failure to connect to the FTP service on the internet server. Make sure that FTP service is running properly on the server and supports anonymous connections.
- 3679 Failure to do open file using FTP service. Make sure that FTP dropbox has read permissions.
- 3680 Failure in getting a file from the server using FTP. Make sure that FTP dropbox has read permissions.
- 3681 Failure in putting a file to the server using FTP. Make sure that FTP dropbox has write permissions.
- 3682 Failure to delete a file on the server using FTP. Make sure that FTP dropbox has read and write permissions.
- 3683 Internet synchronizer exited unexpectedly on the server. Look at the partner replica exchange history on the internet server to figure out the problem.
- 3684 There is no suitable replica with which to exchange.
- 3685 Invalid HTTP address.
- 3686 Invalid replica path or name.
- 3687 Invalid SQL syntax - expected token: Option.
- 3688 Invalid SQL syntax - expected token: For.
- 3689 Invalid SQL syntax - expected token: Privileges.
- 3690 Invalid SQL syntax - expected a table right/privilege.
- 3691 Invalid SQL syntax - expected an object name.
- 3692 Invalid SQL syntax - related tokens did not match. Microsoft Office Access database engine expected GRANT...TO, REVOKE...FROM, ADD...TO, or DROP...FROM.
- 3693 Invalid SQL syntax - expected user or group name.
- 3694 Invalid SQL syntax - expected token: Grant.
- 3695 Invalid SQL syntax - GRANT/REVOKE syntax error.
- 3696 Invalid SQL syntax - expected token: User (or) Group.
- 3697 Invalid SQL syntax - expected token: Password.
- 3698 Invalid SQL syntax - expected password.
- 3699 Invalid SQL syntax - expected token: User.
- 3700 Invalid precision for decimal data type.
- 3701 Invalid scale for decimal data type.
- 3702 The width of a Unicode text column must be an even number of bytes.
- 3703 Operation not supported on replicable databases that have not been converted to the current version.
- 3704 You attempted to open a database that is already opened by user '|2' on machine '|1'. Try again when the database is available.
- 3705 Cannot make the |2 table replicable - too many columns.
- 3706 Cannot make the |2 table replicable - too many indexes.
- 3707 The cascading options for the new reference conflict with existing reference '|'.
- 3708 Syntax error in Transaction statement. Expected TRANSACTION, WORK, or nothing.
- 3709 The search key was not found in any record.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3710 MAPI folder or address book not found.
- 3711 Recovered replicable data. This row was recovered from a corrupted replicable database. Verify that the record contents are correct and then reinsert the record, or delete this conflict record.
- 3712 Other. This record was rejected due to an undefined replication conflict problem.
- 3713 Update/update conflict. Another replica also updated this record. This record lost the conflict. Either resubmit your update or delete this conflict record.
- 3714 Locked table. This record could not be applied during synchronization since the table was locked by another user. Resubmit this conflict record.
- 3715 Unique key violation. This record has the same key value as another record, whereas only unique values are permitted. Either change the key value in this conflict record or the winning record and then resubmit this record, or delete this conflict record.
- 3716 TLV violation. This record contains a field value that does not meet the table level validation constraint. Either update the field value that is violating the validation rule and then resubmit this conflict record, or delete this conflict record.
- 3717 Delete/RI conflict. The primary key record has been deleted by another replica, therefore this referencing record has been rejected. Either create a new primary key record that satisfies the referential integrity constraint and then resubmit your update, or delete this conflict record.
- 3718 Update/RI conflict. The primary key record has been updated by another replica, therefore this referencing record has been rejected. Either create a new primary key record that satisfies the referential integrity constraint, modify the foreign key value in this conflict record to match a valid primary key value and then resubmit your update, or delete this conflict record.
- 3719 Foreign key violation resulting from an invalid primary key record that was involved in a replication conflict. Either create a new primary key record that satisfies the referential integrity constraint, modify the foreign key value in this conflict record to match a valid primary key value and then resubmit this conflict record, or delete this conflict record.
- 3720 Cannot change field '|'. It is part of one or more relationships.
- 3721 Invalid SQL syntax - expected constraint name.
- 3722 Invalid SQL syntax - expected token: DEFAULT.
- 3723 Invalid SQL syntax - expected token: COMPRESSION to follow WITH.
- 3724 Invalid SQL syntax - expected token: UPDATE or DELETE.
- 3725 Invalid SQL syntax - expected token: CASCADE, SET NULL, or NO ACTION.
- 3726 Invalid SQL syntax - expected token: NULL.
- 3727 Invalid SQL syntax - only one update rule and/or one delete rule allowed.
- 3728 Invalid SQL syntax - expected token: AS.
- 3729 Invalid SQL syntax - expected token: SELECT.
- 3730 VIEW cannot contain a parameter.
- 3731 The number of aliases specified shall be the same as the number of output columns.
- 3732 Expected query name after EXECUTE.
- 3733 The database has been placed in a state by an unknown user that prevents it from being opened or locked.
- 3734 The database has been placed in a state by user '|2' on machine '|1' that prevents it from being opened or locked.
- 3735 Too many columns in inverted index.
- 3736 Update/delete conflict. This updated record was deleted at another replica. Either reinsert this conflict record or delete it.
- 3737 Cannot create this type of replica from the given source replica.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3738 Local or Anonymous replicas must synch only to their designated hub replica.
- 3739 The proxy replica has been removed.
- 3740 Cannot add a new column to conflict table '|'. Delete obsolete columns and compact the database.
- 3741 Invalid partner synchronizer. Local or anonymous replica must synchronize with designated hub replica.
- 3742 An internet function timed out.
- 3743 Replica has not been synchronized within the replica set retention period.
- 3744 Counter columns in replicable tables cannot be modified.
- 3745 The combined length of Internet Server Name, HTTP Share name, and FTP alias name should not be greater than 252 characters.
- 3746 Syntax error in parameters clause. Make sure the parameter exists and that you typed its value correctly.
- 3747 Parameter has no default value.
- 3748 Parameter | has no default value.
- 3749 The object is not a stored procedure.
- 3750 Object | is not a stored procedure.
- 3751 Requested row locking, but DB is in page lock mode.
- 3752 Requested page locking, but DB is in row lock mode.
- 3753 Cannot create replica of a Microsoft Office Access database engine SQL replica.
- 3754 Cannot delete from a Prevent Deletes Replica.
- 3755 CHECK constraint '|' does not exist.
- 3756 CHECK constraint '|' already exists.
- 3757 The Microsoft Office Access database engine sorting DLLs could not be loaded properly.
- 3758 Scaling of decimal value resulted in data truncation.
- 3759 Scaling of decimal value resulted in data truncation.
- 3760 Scaling of decimal value resulted in data overflow.
- 3761 The decimal field's precision is too small to accept the numeric you attempted to add.
- 3762 Invalid SQL syntax - expected token: ACTION.
- 3763 Concurrent schema changes caused the create replica operation to fail. Try again.
- 3764 Failed to re-create one or more indexes.
- 3765 Syntax error in CHECK constraint clause.
- 3766 Only simple SELECT queries are allowed in VIEWS.
- 3767 Table '|' could not be made replicable because it could not be opened exclusively.
- 3768 FastFind cannot search on non-column references.
- 3769 Conflict tables cannot be renamed.
- 3770 Counter definition not in valid range.
- 3771 Local or Anonymous replicas cannot be made the design master.
- 3772 Without Administer permission, replica priority must be in the range 0 - |.
- 3773 Cannot delete one or more objects: |.
- 3774 Pin value is not valid.
- 3775 Unable to load Microsoft Office Access database SQL Server Reconciler - MSRPJT40.dll.
- 3776 Unable to exchange between two Microsoft Office Access database SQL Server Replicas.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3777 Illegal Operation performed on a Microsoft Office Access database SQL Server Replica.
- 3778 The Microsoft Office Access database is wrong or missing for this SQL/Microsoft Office Access database replica set.
- 3779 Unable to change Column Level Tracking Property on objects that are already Replicable.
- 3780 Invalid SQL syntax - expected a view name.
- 3781 Invalid SQL syntax - expected a procedure name.
- 3782 Invalid SQL syntax - currently only one column-level CHECK constraint is allowed.
- 3783 Invalid SQL syntax - cannot use multiple columns in a column-level CHECK constraint.
- 3784 Database is already replicable.
- 3785 Invalid SQL syntax - expected token: Database.
- 3786 Invalid SQL syntax - expected a database privilege, such as CREATEDB or CONNECT.
- 3787 This operation is not allowed in subqueries.
- 3788 Cannot create an index on this MAPI folder/addressbook.
- 3789 Illegal column-level constraint.
- 3790 This object requires a newer version of the Microsoft Office Access database engine.
- 3791 This index requires Microsoft Office Access database engine |.
- 3792 The index '|2' requires Microsoft Office Access database engine |1.
- 3793 The column '|2' requires Microsoft Office Access database engine |1.
- 3794 This table requires Microsoft Office Access database engine |.
- 3795 The table '|2' requires Microsoft Office Access database engine |1.
- 3796 The version of AceRecr.DLL that was loaded was too old. Run setup again to get the correct version of this file.
- 3797 The SQL/Microsoft Office Access database engine exchange failed, look in the SQLServer Agent history for details.
- 3798 CHECK constraints are not allowed on replicable databases.
- 3799 Could not find field '|'.
- 3800 '|' is not an index in this table.
- 3801 The object (|) cannot be used in a CHECK constraint clause.
- 3802 Error evaluating | CHECK constraint. |
- 3803 DDL cannot be completed on this table because it is referenced by constraint | on table |.
- 3804 There are no MAPI clients installed on this machine. Install a MAPI client (like Outlook) on this machine.
- 3805 CHECK constraints on table | will not be transferred to this table. CHECK constraints can only be created via SQL DDL statements.
- 3806 Cannot set multiple NULL, NOT NULL attributes.
- 3807 Query | contains an ambiguous column name that is conflicting with the correlation (alias) name |. Either fully qualify the column name or change the correlation (alias) name.
- 3808 Need a version 4.x or greater format system database to perform this operation.
- 3809 Query | was created with a later release of Microsoft Office Access database engine and may have syntax that this version of Microsoft Office Access database engine cannot execute. This query can only be executed with the version of Microsoft Office Access database that created it.
- 3810 Unrecognized keyword WHEN.
- 3811 Query could not be executed.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3812 You cannot update this field because the value you're trying to apply is not valid or would break a data integrity rule. Please correct and try again.
- 3813 SQL pass through queries are disabled.
- 3814 Columns that accept multiple values for a record cannot be included in a multiple-column relationship.
- 3815 Columns that accept multiple values for a record cannot be included in a multiple-column index.
- 3816 The unique index on the '|' column cannot be deleted.
- 3817 The multi-valued field '|' is not valid in a CROSSTAB query.
- 3818 Operation cannot be completed on this database because it uses attachments or multi-valued lookup fields.
- 3819 Find cannot be executed on columns that accept multiple values for a record.
- 3820 You cannot enter that value because it duplicates an existing value in the multi-valued lookup or attachment field. Multi-valued lookup or attachment fields cannot contain duplicate values.
- 3821 You cannot change a multi-valued lookup field to the selected data type.
- 3822 The value cannot be added to this new row until the row has been committed. Commit the row first, and then try adding the value.
- 3823 You cannot edit this field because it resides in a linked Excel spreadsheet. The ability to edit data in a linked Excel spreadsheet has been disabled in this Access release.
- 3824 An INSERT INTO query cannot contain a multi-valued field.
- 3825 SELECT \* cannot be used in an INSERT INTO query when the source or destination table contains a multi-valued field.
- 3826 An UPDATE or DELETE query cannot contain a multi-valued field.
- 3827 Cannot perform an aggregate function on a multi-valued column when a JOIN clause contains a different multi-valued column.
- 3828 Cannot reference a table with a multi-valued field using an IN clause that refers to another database.
- 3829 The multi-valued field '|' cannot be used in an ORDER BY clause.
- 3830 The multi-valued field '|' cannot be used in an GROUP BY clause.
- 3831 The multi-valued field '|' cannot be used in a WHERE or HAVING clause.
- 3832 The current file format no longer supports user-level security. The conversion or compaction process has removed any user-level permissions.
- 3833 The multi-valued field '|' is not valid in the specified JOIN clause.
- 3834 The multi-valued field '|1' is not valid in the expression '|2'.
- 3835 The DISTINCT keyword cannot be used with the multi-valued field '|'.
- 3836 You are attempting to work with a Paradox file that requires the Borland Database Engine (BDE). Microsoft Office Access cannot load the BDE, or the BDE is not correctly installed. To correct this, run the setup program for the BDE.
- 3837 The multi-valued field '|' cannot be used in a UNION query.
- 3838 Multi-valued fields are not allowed in SELECT INTO statements.
- 3839 The specified file exists already.
- 3840 The attachment you are adding exceeds the system resources available.
- 3841 Cannot connect to the Sharepoint site '|'. Try again later.
- 3842 The expression '|' must be part of an aggregate function.
- 3843 An INSERT INTO query that contains a multivalued field cannot contain another field.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 3844 Cannot reference a multi-valued field in an UPDATE or DELETE statement that contains other fields.
- 3845 Microsoft Office Access does not support linking to an Access database or Microsoft Office Excel workbook saved in a format that is a later version than the current database format.
- 3846 The multi-valued field '|' in an ORDER BY must also appear in the SELECT list.
- 3847 ODBCDirect is no longer supported. Rewrite the code to use ADO instead of DAO.
- 3848 You cannot record your changes because a value you entered violates the settings defined for field '|' (for example, a value is less than the minimum or greater than the maximum). Correct the error and try again.
- 3849 Replication is only supported on Access 2000 or Access 2002-2003 format databases. Use the conversion feature in your application to convert the database to the proper format.
- 3850 This file was created in a previous beta version of Excel 2007. Open the file with Excel 2007 to save it to the most recent version of the Excel 2007 file format before opening the file in Access 2007.
- 3851 The schema for this table has changed. You must refresh the table before editing or adding new records
- 3852 Cannot update a multivalued field if its parent recordset is not in edit mode. To place the parent recordset in edit mode use the AddNew or Edit method.
- 3853 Microsoft Office Access cannot create the database in the specified format because of a Group Policy set by your administrator. Create the database using a different file format or contact your administrator.
- 3854 This operation will fail because the text file you are about to import contains more than 255 columns. We recommend that you first make a backup copy of your source file, reduce the number of columns to 255 or less, and then try again.
- 6000 Errors were encountered during the save operation.@@@1@@@1
- 6001 A form or report cannot be the subdatasheet of a table or query.@Only a table or query can be inserted into another table or query.@@1@@@1
- 6002 Microsoft Office Access cannot expand this subdatasheet because all of the records are locked. @Either the RecordLocks property of the form or report or the Default Record Locking option in the Advanced section of the Access Options dialog box (click the Microsoft Office Button, and then click Access Options) is set to All Records.@Reset the value to No Locks or Edited Record, as appropriate.@1@1@472@1
- 6003 The setting for the Precision property must be from 1 through 28.@@@1@@@1
- 6004 The setting for the Scale property must be from 0 through 28.@@@1@@@1
- 6005 The table or query name '|' you entered in either the property sheet or macro is misspelled or refers to a table or query that doesn't exist.@If the invalid name is in a macro, an Action Failed dialog box will display the macro name and the macro's arguments after you click OK. Open the Macro window, and enter the correct name.@@1@@@1
- 6006 Filter by selection of a partial value is only supported for fields containing character data.@@@1@@@1

- 7728 Microsoft Office Access can't overwrite '|': the replica can't be created at this location. @The file you are trying to overwrite may be open. @Close any other applications that might be using this file. @1@@@1
- 7729 Microsoft Office Access can't make a new replica at '|' because the source has the same path and file name. @Choose a different path or file name for the new replica. @1@@@1
- 7730 The synchronization was completed successfully. @@@1@@@1
- 7731 Microsoft Office Access cannot synchronize this member of the replica set because it is open in Exclusive mode. @To open the database in Shared mode, close and reopen the database. @1@@@1
- 7732 '|' is saved as a local table. Changes made to the table will not be sent to the replicas in the set. @To make this table available to other members of the replica set, close the table, right-click it in the Navigation Pane, click Table Properties on the shortcut menu, and then select the Replicated check box. @1@@@1
- 7733 The synchronization request has been received, and the Synchronizer will complete the process as resources become available. @Make sure that the Synchronizer for this member of the replica set is running. It may be several minutes before the synchronization will occur. @1@@@1
- 7734 Microsoft Office Access has saved the design of table '|,' but it will not be made replicable until the Table window is closed. @@@1@@@1
- 7735 Changes to this object can be made only at the Design Master. @Any changes you make will be discarded when the form is closed. @To save your changes, click the Microsoft Office Button, point to Save As, and then save the object under a different name. @1@@@1
- 7736 Application-defined or object-defined error
- 7737 Microsoft Office Access has converted '|1' to the Design Master for the replica set and has created a replica at '|2'. @The new replica will not appear in the list of potential synchronization partners until this database is closed and reopened. @Do you want Microsoft Office Access to close and reopen the database now? @19@@@2
- 7738 Microsoft Office Access has successfully created a replica at '|2'. @However, the new replica will not appear in the list of potential synchronization partners until this database is closed and reopened. @Do you want Microsoft Office Access to close and reopen the database now? @19@@@2
- 7739 Microsoft Office Access has deleted '|' and removed it from the replica set. @This change isn't reflected until the database is closed and reopened. @Please close and reopen the database when you are finished synchronizing replicas. @1@@@1
- 7740 Microsoft Office Access cannot synchronize with a database from a previous version. @Convert the database you are trying to synchronize with, before synchronizing. @1@@@1
- 7741 Microsoft Office Access can't make a new replica at '|' because the value entered for priority is out of range. @Priority for new replicas should be in the range of 0-100. @1@@@1
- 7742 Microsoft Office Access cannot replicate a password-protected database.
- 7743 Backup, restore, and drop database operations are available only when you have at least Microsoft SQL Server 2000 installed on your local computer.
- 7744 Microsoft Office Access can't make a new replica at '|' because the value entered for priority is out of range. @Priority for anonymous replicas should be 0. @1@@@1
- 7745 You can't copy local objects in a replica. Design changes to replicated objects can be made only at the Design Master.
- 7746 The Database administrative components failed to load or initialize. Verify that the components are installed and registered locally.
- 7747 Database Replicas cannot be converted to prior versions of Microsoft Office Access.
- 7748 This stage of the conversion process is finished. To complete the conversion process, synchronize this replica to the (converted) Design Master.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 7749 Open the Design Master and sync to this replica before opening.
- 7750 In Datasheet view, you can't set a control property if the control is part of an option group.
- 7751 In Design view, you can't retrieve the value of the ObjectPalette property for an OLE object contained in a bound object frame. Microsoft Office Access doesn't display the OLE object in the object frame in Design view. Remove the reference to the ObjectPalette property, or switch to Form view before you run the macro or Visual Basic code that references the ObjectPalette property.
- 7752 Microsoft Office Access cannot apply the filter because all of the records are locked. Either the RecordLocks property of the form or report or the Default Record Locking option in the Advanced section of the Access Options dialog box (click the Microsoft Office Button, and then click Access Options) is set to All Records. Reset the value to No Locks or Edited Record, as appropriate.
- 7753
- 7754 You cannot position columns between two frozen columns in a datasheet. To unfreeze all columns, on the Home tab, in the Records group, click More, and then click Unfreeze All Columns.
- 7755 Microsoft Office Access can't start the Chart Wizard. The wizard may not be installed, or this wizard has been disabled. To install the Chart Wizard, rerun the Microsoft Office Access or the Microsoft Office Setup program, click Add/Remove, and then select the Wizards check box. To reenable this wizard, click the Microsoft Office Button, and then click Access Options. Click Add-Ins, and then in the Manage list, click Disabled Items, and then click Go.
- 7756 Application-defined or object-defined error
- 7757 Application-defined or object-defined error
- 7758 This ActiveX control isn't enabled in Form view. You can't set the Enabled or TabStop properties to True.
- 7759 This ActiveX control isn't visible in Form view. You can't set the Visible or TabStop properties to True.
- 7760 This property is locked and can't be changed.
- 7761 An error occurred when you changed the control.
- 7762 The pattern string is invalid.
- 7763 This feature isn't installed, or has been disabled. To install this feature, rerun the Microsoft Office Access or the Microsoft Office Setup program or, if you're using a third-party add-in, reinstall the add-in. To reenable this wizard, click the Microsoft Office Button, and then click Access Options. Click Add-Ins, and then in the Manage list, click Disabled Items, and then click Go.
- 7764 Application-defined or object-defined error
- 7765 Application-defined or object-defined error
- 7766 This control can't be changed to the type you requested.
- 7767 An error occurred while Microsoft Office Access was creating a section.
- 7768 In order to change data through this form, the focus must be in a bound field that can be modified.
- 7769 The filter operation was canceled. The filter would be too long.
- 7770 Microsoft Office Access didn't apply the filter. Microsoft Office Access may not be able to apply the filter if you entered an invalid data type in one of the fields. Do you want to close the filter anyway? If you click Yes, Microsoft Office Access will build the filter, but won't apply it to the recordset. Then it will close the Filter By Form window.
- 7771 You can't set the ColumnOrder property when you are in Form view or Print Preview.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 7773 Microsoft Office Access can't set the LimitToList property to No right now. @The first visible column, which is determined by the ColumnWidths property, isn't equal to the bound column. @Adjust the ColumnWidths property first, and then set the LimitToList property. @1@1@929@1
- 7774 You can't set the MenuBar property while an OLE object is in-place active. @@@1@@@1
- 7775 There are too many controls on the form to allow Filter By Form. @@@1@@@1
- 7777 You've used the ListIndex property incorrectly. @@@2@1@6997@1
- 7778 You can't save an object when you are in the Filter By Form window. @Switch to Form view, and then save the object. @1@@@1
- 7779 You cannot set a form's MenuBar property from its menu bar macro. @1@@@1
- 7780 You're trying to insert into a section that can't grow enough for the control you're trying to add. @The maximum total height for all sections in a report, including the section headers, is 200 inches (508 cm). @Remove, or reduce the height of, at least one section. Then try to add the control again. @1@@@1
- 7782 You can't create a new instance of this form or report while it is in Design view. @@@1@@@1
- 7784 The object you have selected is already open for design as a subform or subreport. To open this object in Design view, select the subform or subreport in the object in which it is already open, and then on the Design tab, in the Tools group, click Subform in New Window.
- 7785 Microsoft Office Access didn't build the filter. @There is an error in the current field. @Do you want to close the filter anyway? @If you click Yes, Microsoft Office Access will undo the changes to the filter, and then close the Filter By Form window. @19@@@2
- 7788 Application-defined or object-defined error
- 7789 Type mismatch. @@@1@@@1
- 7790 Microsoft Office Access can't create the |1. @Either there was an error getting information from the table or query you selected, or a new |2 could not be created. @1@@@1
- 7791 There was an error creating your |1. @Some fields may have been skipped because there was an error getting information about them or because they didn't fit on the |2. @@@1@@@1
- 7792 You can't open a subform or subreport when it is also open in Design view. @@@1@@@1
- 7793 You must save the form '|' before you can embed it. @@@1@@@1
- 7794 Microsoft Office Access couldn't find the toolbar '|'. @@@1@@@1
- 7795 The custom toolbar '|' is the wrong type (menu, shortcut menu, or toolbar) for the property it's being used in. @@@1@@@1
- 7796 The process failed because there is no printer installed. @Because Microsoft Office Access saves the printer settings with each form or report, a printer is needed to convert, enable, copy and paste, import, or export your forms or reports. To install a printer:  Microsoft Windows XP, click Start, and then click Printers and Faxes. Under Printer Tasks, click Add a printer.  Microsoft Windows 2000, click Start, point to Settings, and then click Printers. Double-click Add Printer.  Follow the instructions in the wizard. @1@@@1
- 7797 You must save new objects in the database before you can save them to this external format. @@@1@@@1
- 7798 You can only save select, crosstab, and union queries to this format. @@@1@@@1
- 7799 This form or report is based on a query that exceeds the limit for data in a single record. @Exclude any unnecessary fields from the query, or change some of the field types to Memo in the original tables. @1@@@1
- 7800 You can't create a Microsoft Office Access MDE database from a database in an old format. @Close the database and convert it to the current version of Microsoft Office Access. Then create the MDE database. @1@@@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 8507 There isn't enough memory to execute the macro that updates the active filter. Microsoft Office Access is closing the Filter window. Close unneeded programs. Then try again to open the Filter window. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 8508 Microsoft Office Access can't find '|'. The text string you entered in the Find What box can't be evaluated against the current field. Reenter the text string so that it conforms to the data type of the field.
- 8509 You won't be able to undo this Replace operation. There isn't enough free memory to use the Undo command. Do you want to continue?
- 8510 Microsoft Office Access can't save the current record. Do you want to undo the changes to the record and continue the Paste operation?
- 8511 Records that Microsoft Office Access was unable to paste have been inserted into a new table called '|'. In the Navigation Pane, open the new table to see the unpasted records. After you fix the problems that resulted in the paste errors, copy and paste the records from the new table.
- 8512 None of the field names you pasted onto the Clipboard match the field names on the form. Microsoft Office Access treats the data in the first row on the Clipboard as field names. If you copied the data from another application, the first row of data may have taken the place of the field names. Do you want to paste the field names in the order you defined with the Tab Order command?
- 8513 Some of the field names for the data you tried to paste don't match field names on the form. Microsoft Office Access treats data in the first row on the Clipboard as field names. In this case, some of those field names don't match the field names on the form. Do you want to paste only that data whose names match the field names on the Clipboard?
- 8514 Do you want to suppress further error messages telling you why records can't be pasted? If you click No, a message will appear for every record that can't be pasted.
- 8515 You copied a large amount of data onto the Clipboard. When you copy data onto the Clipboard, only the reference to the object is copied. If you close the source document, however, Microsoft Office Access must paste all the data from its source. Depending on the amount of data, this can take some time. Do you want to save this data on the Clipboard?
- 8516 You selected more records than can be copied onto the Clipboard at one time. Divide the records into two or more groups, and then copy and paste one group at a time. The maximum number of records you can paste at one time is approximately 65,000.
- 8517 Do you want to suppress further error messages telling you why records can't be deleted? If you click No, a message will appear for every record that can't be deleted.
- 8518 You won't be able to undo this Replace operation. Do you want to continue?
- 8519 You are about to delete | record(s). If you click Yes, you won't be able to undo this Delete operation. Are you sure you want to delete these records?
- 8520 You are about to paste | record(s). Are you sure you want to paste these records?
- 8521 You won't be able to undo this Delete operation. The Undo command won't be available because this operation is too large, or there isn't enough free memory. Do you want to delete these items?
- 8522 All timers are in use. Set the TimerInterval property back to zero so that you can start another timer.
- 8523 Do you want to delete the custom palette information from this form or report and revert to the default palette?
- 8524 Do you want to remove this picture from this control?

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 8525 The remote data isn't accessible. You tried to open a form or report that includes a DDE or DDESend function in a calculated control that specifies an OLE server application. Do you want to start the application?
- 8526 Microsoft Office Access encountered a problem while trying to switch views and must close this window.
- 8527 Do you want to delete the group section for the database object '!' and its contents? The group header or footer you want to delete contains controls which will be deleted along with the section.
- 8528 Deleting these sections will also delete all controls in them. You will not be able to undo this action. Do you want to delete these sections anyway?
- 8529 The grouping level that you are trying to delete has a group header or group footer section. The section contains controls that will also be deleted. Do you want to continue?
- 8530 Relationships that specify cascading deletes are about to cause | record(s) in this table and in related tables to be deleted. Are you sure you want to delete these records?
- 8531 The section width is greater than the page width, and there are no items in the additional space, so some pages may be blank. For example, the report width may be wider than the page width.
- 8532 Do you want to remove this picture from the form?
- 8533 Some data may not be displayed. There is not enough horizontal space on the page for the number of columns and column spacing you specified. Click Page Setup on the File menu, click the Columns tab, and then reduce the number of columns or the size of the columns.
- 8534 When you save this form or report, any code behind it will be deleted. You have set the HasModule property to No, creating a form or report that opens more quickly. Any macros associated with this form or report will not be affected, nor will code in separate modules that is called from this property sheet. Are you sure you want to do this?
- 8538 Application-defined or object-defined error
- 8539 Relationships that specify cascading deletes are about to cause record(s) in this table and in related tables to be deleted. Are you sure you want to delete these records?
- 8540 You are about to delete one or more records. If you click Yes, you won't be able to undo this Delete operation. Are you sure you want to delete these records?
- 8541 Microsoft Office Access could not perform the delete operation. An error occurred during the delete operation, no records were deleted.
- 8542 Microsoft Office Access did not detect a relationship between the fields you have chosen. Do you want a relationship to be created for you now?
- 8543 Application-defined or object-defined error
- 8544 You won't be able to undo this paste operation. Do you want to continue?
- 8545 Application-defined or object-defined error
- 8546 Current object must first be saved before exporting data to XML. Would you like to save '!' and then continue?
- 8547 Do you want to save the changes made to the macro and update the property?
- 8548 To complete this operation, Access must modify the RecordSource property of the current form or report. Access will create a new query and embed it directly into the form's or report's RecordSource property. The form or report will no longer be based on the '!' query. Do you want to accept this change?
- 8549 This table contains one or more Lookup fields. Display values for Lookup fields cannot be changed by using the Replace operation.

- 10517 Microsoft Office Access can't add all the records in the make-table query. It set |1 field(s) to Null due to a type conversion failure. A type conversion failure is caused when the data in one or more fields doesn't match the DataType or FieldSize property in the destination table. For example, leaving blank fields in a Yes/No field or adding text in numeric field will cause this error. @1@1@922@1
- 10518 Microsoft Office Access can't delete all the records in the delete query. Microsoft Office Access didn't delete |2 record(s) due to key violations and |3 record(s) due to lock violations. For an explanation of the causes of the violation, click Help. @2@1@10016@1
- 10519 There isn't enough disk space or memory to undo the data changes this action query is about to make. Do you want to run this action query anyway? For information on freeing disk space or freeing memory, search the Microsoft Windows Help index for 'disk space, freeing' or 'memory, troubleshooting'. @19@@@2
- 10520 Do you want to save the changes made to the SQL statement and update the property? The RecordSource or RowSource property contained an SQL statement when you invoked the Query Builder, so the original SQL statement was modified. To close the Query Builder without changing the original SQL statement, click No. @13@1@4309@2
- 10521 Do you want to save the changes made to the query and update the property? The RecordSource or RowSource property contained the name of a query when you invoked the Query Builder, so the original query was modified. To close the Query Builder without changing the original query, click No. @13@1@4309@2
- 10522 You invoked the Query Builder on a table. Do you want to create a query based on the table? @19@@@2
- 10523 You are about to run a pass-through query that may modify data in your table. Are you sure you want to run this type of an SQL query? For information on how to prevent this message from displaying every time you run an SQL query, click Help. @21@1@9058@2

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 10524 | output column(s) in the query were unnamed and will not show any data.
- 10526 Do you want to save the changes made to the SQL Statement and update the text editor? The Stored Procedure or Function contained an SQL statement when you invoked the Query Builder, so the original SQL statement was modified. To close the Query Builder without changing the original SQL statement, click No.
- 10600 Are you sure you want to permanently delete the selected relationship from your database?
- 10601 A relationship already exists. Do you want to edit the existing relationship? To create a new relationship, click No.
- 10602 The field name is missing in row |. You haven't selected a matching field for this relationship in each row of the grid. Select fields so that the grid has the same number of fields on the left and right sides, and then try to create the relationship again.
- 10603 This relationship has been modified or deleted by another user since you opened the Relationships window. Do you want to edit the relationship and overwrite the other user's changes? To update your Relationships window to include the other user's changes, click No.
- 10604 This relationship has already been deleted by another user. To update your view, click OK.
- 10605 The layout of the Relationships window will be cleared. Do you want to continue?
- 10606 You cannot display queries or linked tables in the Relationships window for this database. The database 'I' was created in an earlier version of Microsoft Office Access. To convert this database to the current version of Microsoft Office Access, click the Microsoft Office Button, and then click Convert.
- 10607 The relationship has been created as a one-to-many relationship because there are duplicate entries in the related field. You've tried to create a one-to-one relationship, but the data in the tables suggests that a one-to-many relationship is more appropriate.
- 10608 To create a relationship, use the mouse to drag a field from one table to another.
- 10700 This document was previously formatted for the printer |1 on |2, but that printer isn't available. Do you want to use the default printer |3?
- 10701 This document was previously formatted for the printer '|1 on |2', but that printer isn't available. The page settings shown in the Print Setup dialog box are for the current default printer '|3'. Do you want to continue?
- 10702 Previewing or printing this PivotTable view might take a long time because it displays a large amount of detail data. Microsoft Office Access might not respond for some time. Do you want to continue? To reduce the amount of time required, hide most or all of the detail data in the view. For more information, consult Microsoft Knowledge Base article Q282315.
- 10750 You must save the macro before you run it. Do you want to save the macro now? To save the macro and then run it, click Yes. To return to the Macro window for this macro or to the window you executed the Run Macro command from, click No.
- 10751 Some of the macro actions you are trying to save cannot be performed in Access 97. These actions will be permanently deleted from the macro in the Access 97 version of your database.
- 10800 Microsoft Office Access finished adding the index '|'. Add another index from the Select Index Files dialog box, or click Close.
- 10801 The Microsoft Office Access index information (.inf) file for '|' already exists. Do you want to replace the existing Microsoft Office Access .inf file for the dBASE or Microsoft FoxPro file you're linking? To create a new .inf file, click Yes. To use the existing file, click No. If the .inf file contains invalid or outdated information, you must click Yes to create a new .inf file before you can link the table.

- 10955 You don't have permission to open 'I' for exclusive use. Microsoft Office Access is opening the database for shared access. To open a database for exclusive access, you must have Open Exclusive permission for it. For more information on permissions and who can set them, click Help.
- 10956 ;LCID=0x0409
- 10957 You haven't entered a workgroup ID. To ensure that your workgroup information file is unique, enter a unique workgroup ID of up to 20 numbers or letters. Continue without a workgroup ID?
- 10958 The file 'I' already exists. Replace existing file?
- 10959 Workgroup Files (\*.mdw)
- 10960 Select Workgroup Information File
- 10961 Open
- 10962 You have successfully created the workgroup information file 'I'.
- 10963 Application-defined or object-defined error
- 10964 You have successfully joined the workgroup defined by the workgroup information file 'I'.
- 10965 Application-defined or object-defined error
- 10966 Application-defined or object-defined error
- 10967 Application-defined or object-defined error
- 10968 Microsoft Office Access cannot add a digital signature to your file because Access cannot gain exclusive access to the file. Make sure no other person or program has the file open and try to add the digital signature again.
- 10969 Application-defined or object-defined error
- 10970 Application-defined or object-defined error
- 10971 Application-defined or object-defined error
- 10972 Application-defined or object-defined error
- 10973 Application-defined or object-defined error
- 10974 Modifications to the database or project have invalidated the associated digital signature. This may require you to make a trust decision the next time you open the database or project.
- 29000 There isn't enough memory to create an input area. Close unneeded programs. Then try to create the input area again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.
- 29001 Microsoft Office Access failed to save module 'I'. Your computer may be low on disk space. For information on freeing memory or disk space, search the Microsoft Windows Help index for 'memory, troubleshooting' or 'disk space, freeing'.
- 29002 Microsoft Office Access failed to create the Visual Basic module 'I'. If your database is on a network drive, check your network connection, and then try again.
- 29003 Microsoft Office Access failed to convert or enable your code modules. Your computer may be low on disk space or memory.
- 29004 The new procedure name you provided is invalid.
- 29005 The procedure 'I' already exists. Choose another procedure name.
- 29006 Microsoft Office Access failed to create a Debug window toolbar. The system may be out of resource memory. Close unneeded programs and try again. For more information on freeing memory, search the Microsoft Windows Help index for 'memory, troubleshooting'.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 29007 During the paste or import operation, Microsoft Office Access failed to convert the 'l' module from an earlier version of a Microsoft Office Access database. Your computer may be low on disk space or memory.
- 29008 Microsoft Office Access couldn't create storage space for a Visual Basic module. If your database is on a network drive, check your network connection, and then try again.
- 29009 Microsoft Office Access couldn't open the storage space for a Visual Basic module. Your computer may be low on disk space. For information on freeing memory or disk space, search the Microsoft Windows Help index for 'memory, troubleshooting' or 'disk space, freeing'.
- 29010 The function name is too long. Microsoft Office Access will truncate the function name to 255 characters.
- 29011 Microsoft Office Access failed to save the database. Your computer may be low on disk space. For information on freeing memory or disk space, search the Microsoft Windows Help index for 'memory, troubleshooting' or 'disk space, freeing'.
- 29012 Application-defined or object-defined error
- 29013 This action will reset the current code in break mode. Do you want to stop the running code? To halt the execution of the program so the Module window can be closed, select Yes. To leave the code in the current state, select No.
- 29014 You can't add a reference to a Microsoft Office Access workgroup.
- 29015 You can't remove this reference. Microsoft Office Access needs this reference in order to work properly.
- 29016 You can't add a reference to the open database.
- 29017 The database l was created in an earlier version of Microsoft Office Access. Convert this database to the current version of Microsoft Office Access by using the Convert Database command on the Tools menu (Database Utilities submenu).
- 29018 You can't use a standard module for this operation.
- 29019 The module name 'l' is invalid. The module name may start with the prefix Form\_ or Report\_. The module can't be named Forms, Reports, Modules, Application, Screen, Assistant, CommandBars, References, or DoCmd. The module name may have too many characters.
- 29020 Another user has modified this database. To see the current version, close the database and open it again.
- 29021 This operation isn't available while there is a module in break mode. Reset the executing code and try the operation again.
- 29022 There were compilation errors during the conversion or enabling of this database. The database has not been saved in a compiled state. The performance of this database will be impaired because Microsoft Office Access will need to recompile the database for each session. For information on improving performance, click Help.
- 29023 There are calls to 16-bit dynamic-link libraries (.dll) in modules in this database. These won't work under Microsoft Windows 95 or Microsoft Windows NT. Change your code to call equivalent 32-bit dynamic-link libraries (.dll).
- 29024 The current user account doesn't have permission to convert or enable this database. To convert or enable a database, ensure the following: You must join the workgroup that defines the user accounts used to access the database. Your user account must have Open/Run and Open Exclusive permissions for the database object. Your user account must have Modify Design or Administer permissions for all tables in the database, or it must be the owner of all tables in the database. Your user account must have Read Design permission for all objects in the database. Request that other users close the database.

- 29025 There are calls to 16-bit dynamic-link libraries (.dll) in modules in this database. These won't work under Microsoft Windows 95 or Microsoft Windows NT. Translate these calls to equivalent 32-bit dynamic-link libraries. @2@1@11961@
- 29026 The database that you are trying to open or convert is currently in use, or you do not have permission to open it exclusively. When you convert a database, or the first time you open an earlier version database, another user can't have the database open. Try one of the following: Request that other users close the database. Using the version of Microsoft Office Access in which the database is written, have your workgroup administrator grant you the permission to open the database exclusively. Multiple users can share the database after you convert it, or after you open it for the first time. @1@1@9027@1
- 29027 Microsoft Office Access was unable to save the project. Another user is saving the project now. Do you want to retry? @23@@@1
- 29028 The Save operation failed. @@@1@@@1
- 29029 You are trying to open a read-only database. The first time you open an earlier version database, you must be able to write changes to the database. The database file's read-only attribute may be set; clear this attribute. You may have chosen the Open Read Only command in the Open dialog box. Don't choose this command the first time you open the database. Your license to use this application may have expired. @1@@@1
- 29030 Microsoft Office Access can't establish a reference to the specified database. The referenced database can't be found, or it's locked exclusively by another user so it can't be opened. Restore the referenced database from a backup copy or ask the user that has the database locked to open the database in nonexclusive mode. @1@@@1
- 29031 Microsoft Office Access can't create or open the requested database now. The database may be locked exclusively by another user. @1@@@1
- 29032 The '!' module is open; Microsoft Office Access can't set the permissions on an open module. @@@1@@@1
- 29033 Microsoft Office Access can't add references to a replicated database; changes will be ignored. @@@1@@@1
- 29034 Microsoft Office Access is unable to import the module from the source replica. Synchronize the source database. @1@@@1
- 29040 Microsoft Office Access is currently unable to rename the form, report, or module to '!'. Close the database, reopen it, and then try the rename operation again. @1@@@1
- 29041 One or more forms or reports contains an ActiveX control that could not be loaded. These controls will not function properly until you register them, open the forms or reports in Design view, and save the forms or reports. @1@@@1
- 29042 One or more forms or reports contains an ActiveX control that could not be loaded. These controls will not function properly until you register them, open the forms or reports in Design view, and save the forms or reports. @1@@@1
- 29043 Microsoft Office Access has converted the code in '!' to your current version of Visual Basic. To improve the performance of this database, do the following: Open any module in this database in Design view. On the Debug menu, click Compile And Save All Modules. @1@@@1
- 29044 DAO version 3.0 is not compatible with this version of Microsoft Office Access. Create a reference to DAO version 3.5. For information on setting references, click Help. @2@1@13780@1
- 29045 You can't import, export, create, modify, or rename any forms, reports, pages or modules in an ACCDE, MDE or ADE database. @@@1@@@1
- 29046 You can't create a module for a form or report if it is read-only, or if the database is read-only. @@@1@@@1
- 29047 Microsoft Office Access was unable to open the Visual Basic project for this database. Another user is saving the project now. Do you want to retry? @23@@@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 29048 MDE databases can't reference MDB databases. MDE databases can only reference other MDE databases or type libraries.
- 29049 To add a code module to a form or report, you must switch to Design view and set the HasModule property of the form or report to Yes.
- 29050 Microsoft Office Access couldn't compile this database because one or more references couldn't be resolved. The database has not been saved in a compiled state. The performance of this database will be slower because Microsoft Office Access will need to recompile the database for each session. For information on improving performance, click Help.
- 29051 The current user account doesn't have permission to make an MDE file from this database. To make an MDE file, do the following:
- Join the workgroup that defines the user accounts used to access the database.
  - Make sure the user account has Open/Run and Open Exclusive permissions for the database object.
  - Make sure the user account has Modify Design or Administer permissions for the MSysModules2 table in the database.
  - Request that other users close the database.
- 29052 The Visual Basic for Applications project in the database 'I' can't be converted to the current Visual Basic format. If the database is an MDE, you will need to rebuild the MDE from the source MDB. If you don't have the source MDB, you will need to obtain a new version of the MDE that is compatible with the current version of Visual Basic.
- 29053 Microsoft Office Access can't create any more controls on this form or report. If you have deleted controls from this form or report in the past, you may be able to rename the form or report and then add more controls to it.
- 29054 Microsoft Office Access can't add, rename, or delete the control(s) you requested.
- 29055 The form or report 'I' has too many controls. Reduce the number of controls on the form or report before using it in this version of Microsoft Office Access.
- 29056 Someone else is using 'I' and the Visual Basic for Applications project does not match your version of Visual Basic. You need to open the database exclusively in order to upgrade the Visual Basic for Applications project in this database.
- 29057 The database 'I' is read-only and the Visual Basic for Applications project does not match your version of Visual Basic. You need to open the database read-write in order to upgrade the Visual Basic for Applications project in this database.
- 29058 You can't create a module for a form or report while an instance of the form or report is in browse mode.
- 29059 Microsoft Office Access was unable to display the module.
- 29060 File not found.
- 29061 There were compilation errors during the conversion or enabling of this database. This might be due to old DAO syntax that is no longer supported. For an example on how to fixup the code, click Help.
- 29062 The module name 'I' is misspelled or refers to a module that doesn't exist. If the invalid module name is in a macro, an Action Failed dialog box will display the macro name and the macro's arguments after you click OK. Open the Macro window, and enter the correct module name.
- 29063 The Visual Basic for Applications project in the database is corrupt.
- 29064 You do not have exclusive access to the database at this time. If you proceed to make changes, you may not be able to save them later.
- 29065 Microsoft Office Access can't save design changes or save to a new database object because another user has the file open. To save your design changes or to save to a new object, you must have exclusive access to the file.
- 29066 You do not have exclusive access to the database. Your design changes cannot be saved at this time. Do you want to close without saving your changes?

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 29067 You do not have exclusive access to the database. You cannot convert this database at this time.
- 29068 Microsoft Office Access cannot complete this operation. You must stop the code and try again.
- 29069 Microsoft Office Access cannot save the digital signature at this time. You may be in a database under Source Code Control. You may be in a database which is read only. The database uses either the \*.accdb or \*.accde file name extension. To sign such a database, click the Microsoft Office Button, point to the Publish menu, and then click Package and Sign.
- 29070 Your Microsoft Office Access database or project contains a missing or broken reference to the file '1'. To ensure that your database or project works properly, you must fix this reference.
- 29071 Missing or broken VBE reference to the file '1'.
- 29072 Microsoft Office Access has detected corruption in this file. To try to repair the corruption, first make a backup copy of the file. Click the Microsoft Office Button, point to Manage and then click Compact and Repair Database. If you are currently trying to repair this corruption, you need to recreate this file or restore it from a previous backup.
- 29073 You do not have exclusive access to the database. You cannot continue with the Source Code Control command.
- 29074 Microsoft Office Access failed to create the Visual Basic module. If your database is on a network drive, check your network connection, and then try again.
- 29075 Access cannot add a digital signature to a file created in Access 97 or earlier. Convert the file to Access 2000 or later file format, and then add a digital signature.
- 29076 There was a problem with the digital certificate. The VBA project could not be signed. The signature will be discarded.
- 29077 Application-defined or object-defined error
- 29078 Application-defined or object-defined error
- 29079 Microsoft Office Access is unable to read the VBA modules in this database and cannot recover the modules because the file is read-only. To recover the VBA modules, close the database and make a backup copy of the database. Then open the database with read/write permission.
- 29080 The VBA modules in this database appear to have been saved with errors. Access can recover the modules, but you should backup the database first. To cancel so you can make a backup copy of the database, click Cancel. Then make a backup copy of the database. If you have a backup copy of the database, click OK. When the database opens, examine the modules to see that they are correct. If they are not, you should revert to a recent backup.
- 29081 The database cannot be opened because the VBA project contained in it cannot be read. The database can be opened only if the VBA project is first deleted. Deleting the VBA project removes all code from modules, forms and reports. You should back up your database before attempting to open the database and delete the VBA project. To create a backup copy, click Cancel and then make a backup copy of your database. To open the database and delete the VBA project without creating a backup copy, click OK.
- 29082 The version of Access used to save this database cannot be detected. This problem cannot be corrected because the database is read-only. Click OK, and after the database closes, make a backup copy of the database. Then open the database with read/write permission.
- 30000 Microsoft Office Access could not find the SQL Server specified. Verify that the server name is correct.
- 30001 Microsoft Office Access could not find the database on the server. Verify that the database name is correct.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 30002 Microsoft Office Access could not log on to the server. Verify that the log on information is correct.
- 30004 The Default Max Records setting must be between 0 and 2147483647.
- 30005 Missing SQL command
- 30006 Access was not able to perform this operation because the project is not connected to a SQL Server database.
- 30007 Can't sort on one or more fields specified in 'Order By' property or sorting/grouping dialog.
- 30008 The server you are trying to access is case sensitive. Objects of the same name but of different case are not supported. Using these objects may result in a loss of data.
- 30009 Another user or application has deleted this record or changed the value of its primary key.
- 30010 Cannot apply Filter on one or more fields specified in the Filter property.
- 30011 Cannot get column information for the database object being browsed.
- 30012 A Server Filter cannot be applied to a stored procedure Record Source. Filter not applied.
- 30013 You can't update the record because another user or application deleted it or changed the value of its primary key.
- 30014 The data was added to the database but the data won't be displayed in the form because it doesn't satisfy the criteria in the underlying record source.
- 30015 The specified record source contains duplicate names for some output fields. Use aliases in your SELECT statement to give each field a unique name.
- 30016 The field '|' is read only.
- 30017 This database is not enabled for publication.
- 30018 Cannot create objects of type '|' against current SQL backend. Please check your permissions and server setup.
- 30019 Microsoft Office Access cannot copy a table with a name that is longer than 64 characters.
- 30020 Cannot find column '|'.
- 30021 Cannot use domain functions on stored procedures.
- 30022 The Access project could not be opened. You may not have adequate permissions, or the project may be read-only.
- 30023 Cannot use domain functions on scalar functions.
- 30024 Your password will not be encrypted before it is saved to the file. @Users who view the source contents of the file will be able to see the account user name and password.  Save Password  Cancel @ @36@1@553714179@
- 30025 Invalid SQL Statement. Check the server filter on the form record source
- 30026 Access is unable to connect to '|1' database on the '|2' server. Make sure that the database still exists and that the server is running.
- 30027 The value you entered is not consistent with the data type or length of the column.
- 30028 The database name for the attached database file is blank. Enter a name for your database.
- 30029 This version of Microsoft Office Access does not support design changes with the version of Microsoft SQL Server to which your Access project is connected. See the Microsoft Office Update Web site for the latest information and downloads. Your design changes will not be saved.
- 31000 You must specify criteria for all conditional formats. @@@1@@@1
- 31001 A conditional format expression can't be longer than 946 characters. @@@1@@@1
- 31002 Microsoft Office Access can't modify the control's conditional formats right now. @Your program tried to modify the conditional format of a control while the conditional format was being evaluated. @ @1@@@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 31003 The setting for this property is too long. You can enter up to either 255 or 2,048 characters for this property, depending on the data type.
- 31004 The value of an (AutoNumber) field cannot be retrieved prior to being saved. Please save the record that contains the (AutoNumber) field prior to performing this action.
- 31005 Access failed to evaluate one or more expressions because '|' was referenced in an expression. Only functions and properties that are considered to be safe are allowed in expressions when Access runs in sandbox mode. For more information on sandbox mode, search for "Sandbox mode" in Access Help.
- 31006 This method is not supported for Attachment controls in the current database file format.
- 31500 Microsoft Office Access can't send this format in a mail message. To send this format in a mail message, click Export on the File menu, or use the OutputTo method to create the files and attach them to a mail message.
- 31501 The selected transform file '|' cannot be found. Please select a different transform.
- 31502 Microsoft Office Access can't find the Microsoft Office international dynamic-link library (DLL). Reinstall Microsoft Office.
- 31503 The specified transform did not successfully convert the data. Select a different transform.
- 31504 The data was transformed in a format that cannot be imported.
- 31505 Are you sure you want to remove '|' from the list of available transforms? This will not actually delete the transform file.
- 31506 The selected transform file cannot be found. Select a different transform or remove the transform. Then try to export again.
- 31507 Invalid field data type.
- 31508 Cannot load the Office Web Components Access had a problem loading the Office Web Components Version 9.0. Try going through set-up to re-install them.
- 31509 Cannot load the Office Web Components Access had a problem loading the Office Web Components Version 10.0. Try going through set-up to re-install them.
- 31510 Microsoft Office Access can't load the dynamic-link library |. You need to resolve the failure and start Access again.
- 31511 You have chosen to alter the mode in which SQL syntax will be interpreted in this database. This will mean: Existing queries may return different results or not run at all. The range of data-types and reserved words will change. Different wildcards will be used. It is recommended that you make a backup copy of this database before continuing. If you agree to continue, Access will close this database, compact it, and re-open in the new mode. Select OK to continue.
- 31512 Microsoft Office Access can't open the mail session. You may not have configured an e-mail client on this computer. Ensure that your e-mail software has been installed and configured properly.
- 31513 All open objects must be closed prior to converting to a different version. Do you want Microsoft Office Access to close the objects?
- 31514 Microsoft Office Access can't convert this database to a different version because one or more objects are open. Close all objects and try again.
- 31515 Your database is using SQL Server Compatible Syntax (ANSI 92) for which Access 2000 has limited support. This will mean: Access 2000 users may not be able to see some queries. Existing queries may return different results or not run at all. The range of data-types and reserved words will change. Different wildcards will be used. It is recommended that you change the SQL Server Compatible Syntax (ANSI 92) setting before converting this database to the Access 2000 file format. Select Cancel to abort the conversion process and change the SQL Server Compatible Syntax (ANSI 92) setting.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 31516 Microsoft Office Access can't convert this database to the requested version because it has been 'enabled' to work with newer versions of Microsoft Office Access than it was originally created with. You can convert this database to a newer format, and then retry this operation with the newly converted database.
- 31517 Microsoft Office Access can't convert this database to the requested version because it is from an older version of Microsoft Office Access. You can convert this database to a newer format, and then retry this operation with the newly converted database.
- 31518 The following controls contain expressions that can't be represented in a Microsoft Office Access project PivotTable or PivotChart view: |. Do you still want to switch to PivotTable or PivotChart view?
- 31519 You cannot import this file. You cannot import a text file unless it has one of these extensions: |.
- 31520 You cannot import this file. You cannot import a text file that has one of these extensions: |.
- 31521 Cannot establish connection to the server. |
- 31522 Microsoft SQL Server Desktop Engine must be on the machine running Microsoft Office Access.
- 31523 Microsoft Office Access was unable to open the file '|'. The file may not be an Access file, the path or filename specified may be incorrect, or the file can not be opened exclusively. To repair the file manually, on the File menu, point to Manage Database, and then click Compact and Repair Database.
- 31524 Microsoft Office Access can't transfer the user-defined function '|'. User-defined functions can only be transferred between Microsoft SQL Servers that are version 8.0 or higher.
- 31525 You can copy and paste this object only if at least Microsoft SQL Server 2000 is installed on both the source and destination servers.
- 31526 You cannot create a Microsoft Office Access ADE or MDE file from a database saved in Microsoft Office Access 2000 format. Convert the database to the current version of Microsoft Office Access. Then create the ADE or MDE file.
- 31527 Path not found: |.
- 31528 Table '|' is in use. Please close the table and retry import.
- 31529 View '|' is in use. Please close the view and retry import.
- 31530 Procedure '|' is in use. Please close the procedure and retry import.
- 31531 Microsoft Office Access cannot create table(s) using the information contained in the document(s) you are trying to import.
- 31532 Microsoft Office Access was unable to export the data.
- 31533 Invalid filename.
- 31534 Your database is using SQL Server Compatible Syntax (ANSI 92) for which Access 97 has limited support. This will mean: Existing queries may return different results or not run at all. The range of data-types and reserved words will change. Different wildcards will be used. It is recommended that you change the SQL Server Compatible Syntax (ANSI 92) setting before converting this database to the Access 97 file format. Select Cancel to abort the conversion process and change the SQL Server Compatible Syntax (ANSI 92) setting.
- 31535 Invalid parameters for ExportXML. Press Help for more information.
- 31536 The XML schema properties do not match the existing table structures. Overwrite existing structures?
- 31537 There is already an object named '|' in the database.

- 32545 You are trying to convert a password protected database. Remove the password, and then try again.ldb protect the converted database, use the Encrypt with Password command.
- 32546 You are trying to convert an encoded database that uses a password. Decode the database, remove the password, and then try again.ldb protect the converted database, use the Encrypt with Password command.
- 32547 You are trying to convert a database that is encrypted with a password. Remove the password, and then try again.ldb protect the converted database, use the Set Database Password command.
- 32548 There was an error displaying the mail message. Make sure that there are no open dialogs in Outlook and try again.
- 32549 '| contains over 10,000 rows. Processing may take several moments. Would you like to continue?
- 32550 '| is an empty lookup field. You will not be able to collect data for this field. To continue, remove the empty lookup field from the list of fields to be included in this e-mail message.
- 32551 There was an error displaying the task. Make sure that there are no open dialogs in Outlook and try again.
- 32552 This command is not available when the database is opened from the Web server. Would you like to save a local copy of the database?
- 32553 To sign and deploy a database, you must use a database created with Microsoft Office Access 2007 or later. Convert the database to the Access 2007 format and start the signing process again.
- 32554 Microsoft Office Access could not create a deployment package with the current database. Check the path to the file.@@@1@@@1
- 32555 Microsoft Office Access could not sign the current database. Ensure that the digital certificate used to sign the database is valid.@@@1@@@1
- 32556 Microsoft Office Access could not extract the database. Check the file name and the path to the file.@@@1@@@1
- 32557 Microsoft Office Access could not download the packaged database. Network issues or issues with the Web site may have prevented the download. Start the download again or browse to the site and ensure that it is operating.@@@1@@@1
- 32558 You requested an invalid file. The file may be corrupt. Contact the person who created the file and request a new copy.@@@1@@@1
- 32559 The template is in an unknown format and cannot be opened.
- 32560 The specified template does not exist.

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 32561 The specified template contains errors or is not a valid template.
- 32562 The specified template cannot be created in the specified file format. Specify a different file format for the new database.
- 32563 You cannot use a template file to create a database directly on a SharePoint site.
- 32564 This does not appear to be a template file. The file may have become corrupt, or the package format may contain an error.
- 32565 The |0 '|1' could not be read from the template file. The object may be in an unrecognized format or contain invalid data.
- 32566 The table '|0' in the template could not be associated with a SharePoint list with ID |1.
- 32567 The |0 '|1' in the template could not be loaded from text because of a parsing error. □
- 32568 The table |0 or one of its fields could not be successfully renamed.
- 32569 Failed to add the VBA reference |0
- 32570 A Design Master or Replica cannot be converted to the Access 2007 file format.@@@1@@@1
- 32571 The contents of the Navigation Pane may not be changed while it is locked.
- 32572 Access Projects do not support custom groups in the Navigation Pane. You may not import or export custom groups from an Access Project.
- 32573 Microsoft Office Access cannot perform the export operation.
- 32574 This template requires a SharePoint site with a newer version of Windows SharePoint services. Specify a different site.
- 32575 The acCmdExport command for RunCommand has been deprecated. Use the OutputTo action or one of the more specific RunCommands, such as acCmdExportExcel, acCmdExportRTF, and acCmdExportText.
- 32576 The acCmdImport command for RunCommand has been deprecated. Use one of the more specific RunCommands, such as acCmdImportAttachAccess, acCmdImportAttachExcel, and acCmdImportAttachText.
- 32577 The acCmdLinkTables command for RunCommand has been deprecated. Use one of the more specific RunCommands, such as acCmdImportAttachAccess, acCmdImportAttachExcel, and acCmdImportAttachText.
- 32578 Microsoft Office Access could not load the Access database engine. Run setup again and restart the application.@@@1@@@1
- 32579 You do not have permissions to write to this SharePoint site. Contact your site administrator for assistance.
- 32580 Cannot publish the file | as the file is either checked out or locked for editing by another user.
- 32581 SQL Distributed Management Objects (SQL-DMO) must be on the machine running Microsoft Office Access.
- 32582 The specified file name could not be used to create a database. Specify a different database name.
- 32583 An error occurred while trying to create the database.
- 32584 No object with the given name and type exists in the current database.
- 32585 This feature is only available in an ADP.@@@1@@@1
- 32586 This database object cannot be saved as a report.@@@1@@@1
- 32587 The Source value you have specified is not valid.@@@1@@@1
- 32588 The table which you are trying to append to is currently open and must be closed before proceeding. Do you want to save the changes and close the table?@@@20@@@2
- 32589 Microsoft Office Access encountered an error trying to close the table.@@@1@@@1

## Error Numbers and Descriptions for Microsoft Access 2007

### Number Description

---

- 32590 You cannot link to a database that is stored on an Internet location. You should first save the database to a location that uses a Universal Naming Convention (UNC), such as a server share, and then link to it.@@@1@@@1
- 32591 The file path you specified is not valid. Please specify a full file path.@@@1@@@1
- 32592 The file name extension of '|' is not valid for the format to which you are trying to export. This action is potentially unsafe. Do you want to continue? @@@20@@@2
- 32593 Overwrite existing table or query '|'?@@@20@@@2
- 32594 The Show Column History command is not available while you are working with a SharePoint list offline. Reconnect to the list and try again.@@@1@@@1
- 32595 Microsoft Office Access cannot delete the SharePoint list, because you don't have the necessary permissions to delete the list or the list has been renamed or no longer exists.
- 32596 The Microsoft Office Access Outlook Add-in is disabled in Microsoft Office Outlook 2007. To collect data by using e-mail messages in Microsoft Office Access 2007, verify that this add-in is installed and enabled from within Office Outlook 2007.
- 32597 This database contains links to lists on the selected SharePoint site. Do you want to be able to add shortcuts to each list's View menu? This will enable other people to open forms and reports from the SharePoint Web page.
- 32598 The name '|' is already in use. Enter a different name. @@@1@@@1
- 32599 Only XML files can be imported from an Internet address (http://, ftp://). Enter a path that points to a location on your computer or on the network.@@@1@@@1
- 32600 The list |1 is already used by the |2 link table. Select a different list.
- 32601 You are about to change sites. Any changes you have made to link tables will be discarded. Do you want to continue without saving these changes?
- 32602 The SetProperty action or method failed because there was no form or report context. To establish the correct context for SetProperty, call OpenForm or OpenReport before calling SetProperty, or call SetProperty from an event on a form or report.@@@1@@@1
- 32603 SharePoint List data will be cached in this database. If this database is shared, users who do not have permissions to view this data will be able to see it.
- 32604 There was an error publishing your database. Verify your publish URL and permissions, and then try again.
- 32605 Your data source contains more than 255 fields (columns). Access will import only the first 255 fields.
- 32606 Attachment fields are not supported in the MDB or ADP database formats. Attachment fields are included in the source database table and those fields will not be exported. Do you want to continue?
- 32607 Attachment fields are not supported in the MDB or ADP database formats. If attachment fields are included in the source database tables, those fields will not be imported. Do you want to continue?
- 32608 This database file cannot be converted because it contains linked tables that refer to one or more files that cannot be found. To continue, delete these linked tables or repair the links.@@@1@@@1
- 32609 |1 cannot load customization '|2'. This customization name was already loaded.
- 32610 Automatic configuration of the current version of Microsoft Office Access has failed. Your database might not function correctly. This can occur if you do not have the necessary permissions to install Microsoft Office Access on this computer.@@@1@@@1
- 32611 The file '|' already exists. Do you want to update the existing file?@@@20@@@2

## Error Numbers and Descriptions for Microsoft Access 2007

<b>Number</b>	<b>Description</b>
---------------	--------------------

---

32612	Microsoft Office Access cannot open this file. This file was converted to runtime mode by changing its file name extension to .accdr. This file will open only when Access is in runtime mode. To open the file, either double-click it in Windows Explorer, open it by using a shortcut, or use the /runtime command-line switch. To modify the design of this database, rename it with an .accdb file name extension, and then open it in Access.
-------	--

32613	This feature requires the Microsoft Office Access 2007 program to be installed on your computer.
-------	--

The application you are running is powered by the Microsoft Office Access 2007 Runtime. For information about the differences between the Microsoft Office Access program and the Microsoft Office Access Runtime, in the status bar, click Powered by Microsoft Office Access.
